

MAGNETIC MODULAR JACKS

TE Connectivity's (TE) modular jacks with integrated magnetics offer a highly integrated connectivity solution from the cable to the physical layer for Ethernet network solutions. Integrating the magnetics into the jack allows for higher electro-magnetic interference (EMI) shielding, increasing reliability to the connection and signal. Additionally, integrating power over Ethernet (PoE) allows for remote powering of peripherals directly over the Ethernet line.

KEY BENEFITS

- Useful for heavy duty industrial applications due to extended temperature range and robust construction.
- Integrated magnetics allows for higher EMI shielding, creating more reliable connections and reducing signal degradation.
- PoE features allow for not only signal connection, but also power, suiting a wide variety of peripherals and ancillary devices.
- Useful for networking, data center, medical, and industrial applications utilizing Ethernet networking and connectivity solutions.

KEY FEATURES

- Extended temperature range (-40°C to 85°C) allowing for more robust operations and addressing the needs for demanding applications.
- Supports PoE standard IEEE 802.3at.
- Compact design on PCB saving space, while providing integrated magnetics and PoE.
- 1GBT, 2.5GBT, 5GBT, and 10GBT capable designs meeting a wide-variety of data transfer requirements.
