## ALBPCL75P

Engineered for lean manufacturing the high performance 75P clamp was designed as a one-for-one replacement to outperform industry standard metal clamps (such as AS21919). Featuring a locking feature, butterfly stacking, weight savings, durable PEEK polymer band material and multiple cushion material options that are completely non-conductive and non-corrosive, the 75P is a versatile solution for anyone looking to reduce weight and installation time.

### Specifications

#### Materials:

Band: PEEK per Mil-P-46183 Type I  
Cushion: See Cushion Materials pg.3

#### Flammability:

Per cushion material

#### Temperature Limits:

Per cushion material

#### Fluid Resistance:

Per cushion material

### ALBPCL75P Cushion Materials

Cushions for the 75P Clamp are available in a wide variety of rubber materials, including Ethylene Propylene, Nitrile, Chloroprene, Silicone, and Fluorosilicone. Cushion profile, materials, and color-coding are the same as metal clamps for maximum compatibility with any current application and environment.

EPR (E)	Nitrile (N)	Chloroprene (G)	Silicone (S)	Fluorosilicone (J)

### Cushion Material Codes

Code	Material	Color	Application
E	Ethylene Propylene per AMS 3253	Purple	For use in areas exposed to phosphate ester hydraulic fluid (Skydrol). Excellent ozone resistance. Not resistant to petroleum-based fluids.
N	Nitrile per AMS 3224	Yellow	For use primarily in fuel immersion and with fuel vapors. Good ozone resistance. Not resistant to phosphate ester based fluids. Not for use on titanium tubing.
G	Chloroprene per AMS 3209	Black with Blue Stripe	For general use in areas exposed to petroleum based hydraulic fluids and occasional fuel splash. Excellent ozone resistance. Not resistant to phosphate ester based fluids. Not for use on titanium tubing.
S	Silicone per AMS 3310	White	For elevated temperature usage in areas exposed to phosphate ester and other synthetic fluids. Unaffected by ozone. Not resistant to petroleum based fluids.
J	Fluorosilicone per Mil-R-25988 Type II, Class 1, Grade 60	Blue	For elevated temperature usage in areas exposed to petroleum based fluids. Unaffected by ozone. Not resistant to phosphate ester based fluids.

**U.S. PATENT NOTICE**  
The product specialized in this brochure is covered by U.S. Patent UA9.829.119B2

# SYSTEM ATTACHMENTS

## High Performance P-Clamps

Engineered for lean manufacturing, high performance P-Clamps were developed to replace and out perform traditional P-Clamps and Saddle Clamps. Featuring an overmolded silicone cushion with PEEK polymer, our clamps are completely non-conductive/non-corrosive, lightweight, and very durable.

### Specifications

#### Materials:

Plastic (Glass-Reinforced): Polyetheretherketone per MIL-P-46183  
Elastomer protection: Silicone Rubber per ASTM-D-2000

#### Temperature Limits:

Operating temperature: -65°F to 350°F (-54°C to +177°C)  
Excursions: Up to 500°F

#### Flamability:

UL94. VO: FAR25.853

## High Performance LDG P-Clamps

Amphenol Pcd's LDG P-Clamps use a softer durometer rubber for clamp cushioning, reducing wear and tear on mission-critical cable harnesses without compromising the strength and performance of the clamp. Specifically designed for high performance aerospace cables, such as the MT/MTL product lines, they are easy to use, simple to maintain, and available in 17 different sizes.

### Specifications

#### Materials:

Plastic (Glass-Reinforced): Polyetheretherketone per MIL-P-46183; Black Elastomer protection: Silicone Rubber; 20 durometer Shore A; Light Green

#### Temperature Limits:

Operating temperature: -65°F to 350°F (-54°C to +177°C)  
Excursions: Up to 500°F

#### Flamability:

Clamp base: UL94, VO; FAR25.853  
Cushion: Meets UL94, HB

## Light Weight C-Clamps (CC1339L)

Amphenol's pre-mountable C-Clamps (Cable Clamps) provide routing, support and fixing for cable harnesses of various diameters. They are used in the wing sections of aircrafts, in the fuselage for power and electrical cables, as well as inside the cabin for in-flight entertainment or cabin service systems. Different materials and configurations are available depending on the temperature and routing of the conduits (including versions for use inside the fuel tank).

- Non conductive/ non corrosive
- Overmolded

### Specifications

**Materials:**  
Thermoplastic  
Elastomer protection : Silicone

**Temperature Limits:**  
Operating temperature: -55°C to +150°C

**Flammability:**  
Conforms to ABD0031 standard

**Fluid Resistance:**  
Spray tests: Fuels, hydraulic fluids, lubrication oils, cleaning fluids, de-icing fluids, insecticides

## C-Clamps 5516

Amphenol's pre-mountable C-Clamps (Cable Clamps) provide routing, support and fixing for cable harnesses of various diameters. They are used in the wing sections of aircrafts, in the fuselage for power and electrical cables, as well as inside the cabin for in-flight entertainment or cabin service systems. Different materials and configurations are available depending on the temperature and routing of the conduits (including versions for use inside the fuel tank).

- Non conductive/ non corrosive
- Overmolded

### Specifications

**Materials:**  
Thermoplastic  
Silicone

**Temperature Limits:**  
Operating temperature: -55°C to +255°C

**Flammability:**  
Conforms to ABD0031 standard

**Fluid Resistance:**  
Spray tests: Fuels, hydraulic fluids, oils, cleaning fluids, de-icing fluids, insecticides

## Fairlead Blocks

Designed to ensure that pipes and tubes are properly secured throughout their entire length, Amphenol Pcd's Fairlead Blocks provide stability against surges and vibration and are available in multiple materials depending on required chemical environment. Our blocks accommodate a wide range of tube diameters and the products can be supplied with all-captive components, eliminating loose parts and potential FOD.

### Specifications

- High Performance Materials: Strong, Durable & Lightweight
- All-Captive Components: Lean manufacturing; reduces costs
- Design & Engineering: Prevents wire and tube chaffing; protects against surges and harsh vibration
- Fairlead blocks are custom-built to order

## Customer Fairlead Blocks

Rails/Spacers Specifications		
Materials	Coating	Application
Aluminum Alloy 6061-T6 or 2024-T3	Chemical Conversion Coating per MIL-C-5541 Class 1A	Light Duty
Stainless Steel per ASTM A109	Cadmium Plate per QQ-P416, TYPE II Class I	High Performance
Carbon Fiber Composite	Contact Amphenol Pcd for availability and information	

Cushion Block Specifications				
Materials	Specifications			
	Temperature Range	Chemical Resistance	Color	Duro
Ethylene Propylene Rubber (EPR)	-65°F to 275°F (-54°C to 135°C)	Areas exposed to Skydrol	Purple	55-75
Nitrile Butadiene (Buna-N)		Fuel Tank Application	Yellow	
Silicone		Fire Resistant, Low smoke, Low toxicity requirements	-	
Fluorosilicone	-65°F to 500°F (-54°C to 260°C)	High temperature areas; Engine Applications	-	

# Hat Supports

Designed to secure and guide wire bundles throughout an aircraft, Amphenol Pcd's Hat Supports are designed for lean manufacturing and durability. Built in a one-piece, lightweight design with multiple fixing points, the high performance products are strong, durable and make wire bundle installation and maintenance easy. They are able to support large bundles and high stress requirements.

## Specifications

## Cable Supports

Amphenol Pcd's Cable Supports are designed to fix to the aircraft's airframe, helping to secure and manage cable harnesses as they run throughout the aircraft body. They are offered in nylon and are designed for use in airframe, fuel tank, and engine applications. Available in various standard configurations and sizes, Amphenol Pcd also offers customized products to help meet specific customer requirements.

### Specifications

#### Materials:

Nylon per ASTM-D-4066 PA0121

Elastomer protection: Brown Silicon or Blue Fluorosilicone

#### Environment:

Operating temperature: -67°F to +275°F (-55°C to +135°C)

#### Flammability:

To meet FAR 25.853 AMTD 25-853 (a) and ADB0031

#### Fluid Resistance:

ASTM D 543, MIL-T-81533, TT-T-266, TT-M-261, ASTM D 1635, MIL-T-5624, MIL-T-83133

### Application

- 1 Cable tie
- 2 Cylindrical support: guides the cables, ensures optimal fixing
- 3 Ramp: to ease quick feed-in of cable tie

### User Warning

- Eliminates any dehydration agent in storage.
- If the piece regains its humidity, this may cause a coloration of the material.
- Surface coloration does not affect technical properties of the material.
- Wiring accessories conform to ROHS and REACH requirements.

## Cable Separators

Amphenol's Cable Separators are used to help separate cable harnesses from one another, aiding in organizing cable routing throughout the aircraft. Available in either Nylon or PEEK material, they maintain clearance between two parallel or crossing cable harnesses preventing wire abrasion. Nine different versions are available and they are qualified to Airbus standard ABS1144. Different material upon request.

## Lightening Hole Bushing

Amphenol Pcd's QuickSNAP Lightening Bushings are made to help guide wired bundles through the aircraft's frame and stringers. Unlike traditional lightening bushings, our products significantly reduce installation times and reduce the amount of foreign object debris (FOD). The lightweight QuickSNAP's are made with smooth edges in order to reduce wire chaffing, are available in various standard configurations and sizes, and have the option for custom products as well.

### Specifications

#### Materials:

Nylon per ASTM-D-4066 PA0121

Elastomer protection: Brown Silicon or Blue Fluorosilicone

#### Environment:

Operating temperature: -67°F to 302°F (-55°C to 150°C)

#### Flammability:

FAR 25.853

### Traditional Lightening Hole Bushing

#### **15 Minutes to Install**

*6 part installation*

- 3 Rivets
- 1 Nylon part
- 1 Caterpillar
- 1 Sheet Metal part

### QuickSNAP Lightening Hole Bushing

#### **15 Seconds to Install**

*1 part installation*

# Standoffs

Made to help guide wire bundles through the aircraft, Amphenol Pcd's High Performance Standoffs are very strong, durable, and lightweight. Our Standoffs are made with glass-reinforced PEEK a very robust, non-conductive/non-corrosive, and lightweight material with excellent chemical resistance. They come with a locking feature for security, are designed with ribs to provide additional strength, and support a wide range of clamp sizes and harness supports for added convenience.

## Specifications

### Materials:

Glass-Reinforced PEEK Per MIL-P-46183 with metallic threaded insert

### Environment:

Operating temperature: -67°F to +266°F (-55°C to +130°C)

## Jig Board Clamps

Amphenol Pcd's Jig Board Clamps are made for pre-installation wire harness assembly. Made of Acetal, our durable clamps maintain their original shape after continuous use and their smooth edges diminish wear on the harnesses as they are being assembled. Developed in multiple sizes, Amphenol Pcd's Jig Board Clamps can accommodate a wide range of cable diameters, while the one-piece design enables efficient inventory management.

### Specifications

- Designed with Acetal: Strong durable; long life-time
- Various Sizes: Accommodates wide range of wire diameters
- One-Piece Design: Simple and easy to use
- Smooth Edges: Limits wire chaffing and reduces wear and tear
- No elastic band or straps required: Minimizes installation time

## Power Feeder Spacer

Power Feeder Spacers separate and provide a constant spacing between the power feeders. The custom design of this product allows a six degree rotation on the power feeder bundle and doesn't fight against the natural flow of the cable. It is designed to sit within Omega Clamps which can be used as anchor points.
