

# LL01OS-BWxxL Data Sheet

*For Osram Multi-Color and Single-Color LEDs*

## Features:

- High efficiency
- Available in 2 beam Patterns
- Optimized for uniform effects
- Lens without Housing

## Typical applications :

- Stage Lighting
- Street Lights
- Decorative Light
- Architectural Lighting
- Down Light

## General Information

- **Compatible Led Type :**

The LL01OS-BWxxL single lens are optimized for both Multi-Color R.G.B Osram LEDs and Single-Color Osram LEDs (Osram W5AM White) from Osram Opto.<sup>(1)</sup>

- **Beam Angle Type :**

An optimized profile integrate different front shape enable the generation of two different lens models : medium beam (30deg), biggest beam (76deg) <sup>(2)</sup>

- **The Way to Assembly :**

The Lens should be assembled to the PCB board or MCPCB upon LEDs which provides the most appropriate related position, so as to achieve the best uniform results

**\* Manually installation or if necessary thermal glue are recommended.**

- **Function :**

LL01OS-BWxxL provides exceptional color mixing result with the highest efficiency through careful engineering and precision manufacturing process.

## General Specifications

- Lens Material                      Optical Grade PMMA    PC
- Operating Temperature range    -40°C ~ + 70°C (upper limit +80°C)
- Storage Temperature range       -40°C ~ + 70°C (upper limit +80°C)

\*Average transmittance in visible spectrum 400nm~700nm > 90%

Notes:

(1) Osram W5AM is a trademark of Osram, Inc, for technical information on LEDs, please refer to Osram, Inc, [www.Osram.com/xlamp](http://www.Osram.com/xlamp).

(2) Typical beam divergence will be affected by different color of LEDs.

## Optical Specifications [ Typical beam Angle and intensity (cd/lm) of LL01 lens ]

### • Osram W5AM LED

Typical Cone Angle (degree) <sup>(3)</sup> with Osram W5AM			
Part Number	Red LEDs	Green LEDs	Blue LEDs
LL01OS-BW30L	--	--	--
LL01OS-BW76L	--	--	--

The typical cone angle measures where the luminous intensity is 90% of the peak value of intensity. This typical cone varies with LED color due to different chip size and chip position tolerance.

Typical on axis intensity (cd/lm) <sup>(4)</sup> with Osram W5AM			
Part Number	Red LEDs	Green LEDs	Blue LEDs
LL01OS-BW30L	--	--	--
LL01OS-BW76L	--	--	--

Luminous intensity depends on the flux binning and tolerance of the LEDs. Please refer to the LEDs data sheet for more details on Flux binning and mechanical tolerance.

### • Osram W5AM LED

Typical Cone Angle (degree) <sup>(3)</sup> with Osram W5AM			
Part Number	White LEDs	Warm white LEDs	
LL01OS-BW30L	31	28	
LL01OS-BW76L	76	75	

The typical cone angle the full angle measured where the luminous intensity is 90% of the peak value of intensity. That typical cone varies with LED color due to different chip size and chip position tolerance.

Typical on axis intensity (cd/lm) <sup>(4)</sup> with Osram W5AM			
Part Number	White LEDs	Warm white LEDs	
LL01OS-BW30L	370	330	
LL01OS-BW76L	40	28	

Luminous intensity depends on the flux binning and tolerance of the LEDs. Please refer to the LEDs data sheet for more detail on Flux binning and mechanical tolerance

#### Notes:

(3) The typical divergence will be changed by different color, chip size and chip position tolerance. The typical total divergence is the full angle measured where the luminous intensity is half of the peak value.

(4) The efficiency value listed above is the total value of the whole lens model, the value depends on the total flux of the LED used. Luminous intensity depends on the LEDs flux and its tolerances, for more details of LED flux, please check Osram data sheet at [www.osram.com](http://www.osram.com).

## Mechanical Specifications

### • Usage and Maintenance :

1. If necessary, clean lenses with mild soap, water and soft cloth
2. Never use any commercial cleaning solvents on lenses, like alcohol
3. Please handle or install lenses with wearing gloves, skin oils may damage lens or its optical characteristic.

### 1. Lens + Leds+MCPCB assembly instruction

### 2. View assembly lens with MCPCB:

Notes:  
(1) All dimensions are in mm.  
(2) Drawing not to scale.  
(3) Collimator material is PMMA.

## Illumination charts

\*Osram single white LED: Osram W5AM

LL01OS-BW30L	LL01OS-BW76L
1. Beam Pattern	1. Beam Pattern
	
2. Light Distribution Curve	2. Light Distribution Curve
	
3. Illuminance	3. Illuminance
	

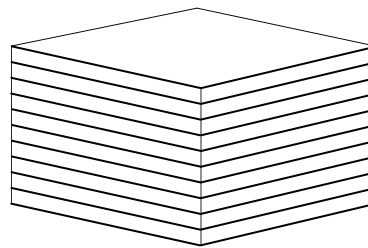

Notes: The Flux of Osram W5AM LED is 80 lm

## Package

Item	Quantity	Total	Size (long*width* high)
Tray	42	42pcs	34*30*3.5 cm
Inner box	10tray/box	420pcs	35*31*21 cm
Outer box	2 Inner box/outer box	840pcs	64.7*36.5*24 cm

42pcs/tray

420pcs/inner box

840pcs/outer box
