RDA6655A Front-end Module

Download: For Datasheet

The RDA6655A is a high-power, high-efficiency quad-band front-end Module. This device is designed for GSM850, EGSM900, DCS1800, PCS1900 handheld digital cellular equipment. The module consists of quad band power amplifiers and antenna switch. The power amplifiers, switch and their controller are fabricated with GaAs HBT and CMOS respectively.

The device package is 5mm×5mm×1.1mm 32-pins LGA. The input and output are realized on-chip matched to 50Ω. The RDA6655A requires few external components, simplifying PCB layout and reducing PCB board space.

Features

- 1.Ultra-Small 5mm×5mm Package
- 2.Quad-Band Power Amplifier with RF switches
- 3.ESD protection at Antenna
- 4.Complete Power Control Solution
- 5.High efficiency
- 6.Low supply voltage (3~4.5V)
- 7.Input/Output matched @ 50Ω
- 8.Advanced HBT/CMOS process
