Aluminum Rack Blanking Lightweight Rack Panels *PBPA Series*

Lightweight aluminum rack panels designed to cover unused rack space and improve airflow efficiency.

TAA COMPLIANT

EIA STANDARDS

MANUFACTURED IN NORTH AMERICA

RoHS

Key Features and Benefits

- 8-gauge (0.125 in) 5052-H32 aluminum construction provides lightweight durability and corrosion resistance for rack environments.
- Designed to install in unused rack space to improve cooling efficiency and prevent air recirculation.
- Lightweight design simplifies handling and installation compared to steel panels.
- Fits standard 19 in EIA-compliant rack rails for universal compatibility.
- Available in multiple heights (1U–10U+) to match rack configurations.
- Offered in multiple finishes including powder coat and unfinished aluminum for custom applications.
- Smooth finish provides a clean, professional rack appearance.
- Helps improve rack organization and airflow separation.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Finish options (GREENGUARD, TSCA, RoHS compliant) support environmental and durability requirements.

The PBPA Series aluminum rack panels provide a lightweight solution for covering unused rack space while improving airflow and cooling efficiency. Constructed from durable aluminum, they offer corrosion resistance and easy handling for a wide range of rack environments. By preventing hot and cold air mixing, the PBPA Series supports proper thermal management and clean, organized installations in data centers, telecom rooms, and network systems.

Where the PBPA Series Works Best

- Data centers and server rooms
- Telecom and network installations
- High-density rack environments
- Wall mount and floor-standing racks
- Installations requiring lightweight panel solutions

Best Applications for the PBPA Series

- Covering unused rack space to improve airflow
- Preventing hot and cold air recirculation
- Supporting thermal management strategies
- Providing lightweight panel solutions for large openings
- Improving rack organization and appearance
