Details

This Raspberry Pi Power Filter Board integrates multiple solid capacitors, ceramic capacitors and tantalum capacitors to perform parallel hybrid filtering.

It can filter low-mid-high frequency power noise in the power supply, which provides the whole system with a stabler power supply and makes sound quality purer.

Meantime, the board can also effectively protect your Raspberry Pi main-controller so as to to extend its service life.

Directly plug the module to the Raspberry Pi GPIO port for use. With a DC power cord, it can also supply power for Raspberry Pi and other modules. And when used with audio decoder board, it turns Raspberry Pi into a high-quality stereo.

Features

- Filter low-mid-high frequency power noise
- Provides a stabler power supply
- Effectively protect Raspberry Pi board

Applications

- Raspberry Pi audio output

Specification

- Compatible Model: Raspberry Pi 3B+/4B
- Onboard Capacity: 5526μF
- Capacitor Connection: Parallel
- Power Input: 5V/3A
- Color: Black
- Dimension: 56*65mm/2.20*2.56"

Shipping List

- Raspberry Pi Power Filter Board x1
- Copper Pillar & Screw & Nut x4
