Description	Features	What's Included	Software	Support
-------------	----------	-----------------	----------	---------

Digilent is now a proud distributor of Measurement Computing Corporation (MCC) DAQ and data logging products. MCC is a leading supplier of data acquisition solutions that are easy-to-use, easy-to-integrate, and easy-to-support.

The USB-2600 Series feature up to 64 SE analog inputs, 16-bit resolution, 1 MS/s sample rate, four 16-bit analog outputs, 24 digital I/O, four 32-bit counters, and four 32-bit timers.

USB-2627 features 16 SE analog inputs.

USB-2637 features 64 SE analog inputs.

The optional **TB-103 screw terminal board** connects directly to the 40-pin headers on a USB-2600 Series board, and secures to the board with the included stand-offs, giving access to all signal I/O.

Software support includes free DAQami software for out-of-the-box data logging, viewing of data, and generating signals. Also included are drivers for the most popular applications and programming languages including Visual C++[®], Visual C#[®], Visual Basic[®].NET, DASyLab[®], LabVIEW[™], MATLAB[®], Linux[®], and Python[™].

OEM/Embedded Customers- please contact our **sales department** for volume pricing, OEM/board-only versions of these devices, and assistance with your application.
