Multilevel installation terminal block, 2003 Series, gray

Our multilevel installation terminal block (item number 2003-6645) makes connections quick and easy. Strip lengths must be between 10 mm and 12 mm when connecting conductors to this multilevel installation terminal block. Featuring conductor terminals along with Push-in CAGE CLAMP®, this product delivers reliable performance. Push-in CAGE CLAMP® technology provides a universal connection solution for any type of conductor. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. This multilevel installation terminal block is suitable for conductor cross sections ranging from 0.25 mm² to 4 mm². It comes with three levels and five clamping points that you can use to connect three potentials. The gray housing is made of polyamide (PA66) for insulation. These installation rail-mount terminal blocks are mounted using DIN-35 rails..

Installation Notes

Conductor termination

**All conductor types at a glance**

Inserting a conductor via push-in termination.
Solid conductors with cross-sections from either one size above, or up to two sizes below, the rated cross-section can be simply pushed in – no tools needed.
Inserting a conductor via operating tool.
Connecting fine-stranded conductors without ferrules, or small cross-sectional conductors that cannot be pushed in, is performed similarly to the original CAGE CLAMP® – just use an operating tool.

Commoning

Commoning two potentials in one single jumper slot via extremely slim staggered jumpers.

Removing a staggered jumper:
Insert the operating tool between the staggered jumpers, then lift up the jumper.
