Key Features and Benefits

- Heat-treated SAE 1050-1065 spring steel construction provides long-lasting strength and dependable equipment mounting in square-hole rack rails.
- Designed for 0.375-inch (9.54 mm) square-hole rack rails, making them compatible with Hammond cabinets and most industry-standard square-hole racks.
- Available in 10-32, 12-24, and M6 thread sizes to match the most common rack equipment mounting requirements.
- Zinc-plated finish provides corrosion resistance for long-term reliability.
- Recommended torque spec 31.4 +/- 20% inch-lbs
- Heat-treated through austempering for consistent spring tension and secure retention in rack rails.
- Available in convenient 50-piece and 100-piece packages for maintenance departments, installers, and large deployments.
- Rear-loading design allows quick installation into square-hole rack rails.
- Manufactured in North America within an ISO 9001 certified facility.
- TAA-compliant.
- RoHS and REACH compliant.

The CAGNUT Series provides replacement cage nuts for square-hole rack rails used in data centers, telecommunications rooms, industrial facilities, and AV installations. Manufactured from heat-treated spring steel, these cage nuts install securely into standard 3/8-inch square holes to create a strong threaded mounting point for rack-mounted equipment. Available in 10-32, 12-24, and M6 thread sizes, they support virtually every standard rack mounting application.

Whether replacing lost hardware, expanding an existing rack, or stocking maintenance supplies, the CAGNUT Series offers a dependable solution for mounting servers, switches, patch panels, PDUs, UPS systems, and other rack equipment. Pair them with Hammond SCREW Series rack screws for replacement hardware or choose the **CAGKIT** Series when you need both screws and cage nuts in one package.
