The Model 4810A is an ultra-stable MEMS accelerometer packaged in a rugged, low-profile stainless steel housing. The accelerometer is available in ranges from ±2 to ±200g with a wide bandwidth from DC to 2000Hz. The model 4810A accelerometers incorporate gas damped variable capacitance MEMS sensing elements that provide exceptional performance over a full operating temperature range of -55°C to +125°C. The accelerometers are designed for 4 to 30Vdc excitation voltage and include a self-test option.

For a triaxial version, TE Connectivity also offers the model 4835A accelerometer.
