Alligator Clip with Pigtail (4 Pack)
● CAB-13191 ROHS ✔

DESCRIPTION   DOCUMENTS

This is a 4 pack of wires that are pre-terminated with an alligator clip on one end and a hookup pigtail on the other. Alligator clips are a staple part for any workbench and with these cables you will be able to easily incorporate those clips into a breadboard, development platform, or anything else that you would normally be able to attach a hookup wire to.

Each Alligator Clip with Pigtail cable has a wire length of 30cm (that's a little less than 1ft) and a male pin that easily inserts into a standard 0.1" connector. Each pack consists of two red cables and two black cables.

More colors!

SuperCrackMunkey / about 3 years ago / ★ 1

This. This was smart. We've all made (or at the very least thought of) something like this. Being able to buy them is far better.

JGuthridge / about 3 years ago / ★ 1

I made a set of these on my own several years back (and even shared with the Sparkfun gang) and let me tell you they are really useful. There are just some things that don't like breadboards, and little expedients like these really help.

START SOMETHING.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
