

## Product Highlights

- Operating temperature from -65°C to +200°C (-85°F to +392°F)
- ABS2413
- FAR Part 25
- Halogen-free
- Self-wrapping design
- Easy to apply and remove
- Ideal for reworking components without disconnecting them
- Tough fabric texture
- Water repellent

**ROUNDIT® 2000 MA** is a woven combination of meta-aramid and PPS (poly-phenylene sulfide). The meta-aramid/PPS blend in a flat weave construction gives ROUNDIT 2000 MA a rugged yet smooth texture and appearance for high temperature bundling and abrasion resistance. This product is rated to +200°C (+392°F) and is non-halogenated.

ROUNDIT 2000 MA is ideal for commercial aircraft applications due to its excellent abrasion resistance and halogen-free qualities.

ROUNDIT® products are tough, lightweight oversleeves used to bundle and protect cable assemblies, hoses and wire harnesses from chafing, cutting and abrading. The self-wrapping feature of ROUNDIT products allows for quick and easy application and removal of the product for assembly and maintenance. The product may also be applied or removed without disturbing connectors or fittings.

Our manufacturing sites are certified ISO 9001, IATF 16949, or AS/EN 9100, ISO 14001 and ISO 45001 (Selected Sites)

As an added benefit, the patented ROUNDIT® Tool will help improve installation time and is designed to install ROUNDIT® products on cable and wire configurations.
