RxxP06S

1 Watt SIP7 Output for GaN Application

3 YEAR warranty

Description

High slew rate GaN transistor drivers require an isolated 6V supply with high isolation voltage and low isolation capacitance. The RxxP06S series have been specially designed to fulfill this demanding requirement with 6400VDC/sec isolation and <10pF isolation capacitance. The internal transformer uses a pot-core to physically separate the input and output windings, yet the converter still fits into an industry standard SIP7 case. Input voltage options of 5, 12, 15 or 24V are available and the RxxP06S series is safety certified to the latest UL/IEC62368 standard.

Selection Guide

Part Number	nom. Input Voltage [VDC]	Output Voltage [VDC]	Output Current [mA]	Efficiency typ. (1) [%]	max. Capacitive Load (2) [µF]
