Female connector, 2022 Series, gray

Enjoy easy electrical installations with this female connector (item number 2022-102/142-000). Pluggable rail-mount terminal blocks are primarily found in switchgear units and control systems, most notably in railroad technology. These innovative systems combine the benefits of rail-mount terminal blocks and connectors for a flexible and reliable wiring system. You also have the option of pre-assembling installations, which not only makes production but also installation, operation, and maintenance more efficient and cost-effective. Our pluggable rail-mount terminal block is rated for 690 V and is designed for use with a rated current of up to 24 A. Conductors should only be connected to this female connector if their strip length is between 10 mm and 12 mm. This product features conductor terminals and utilizes Push-in CAGE CLAMP®. Our Push-in CAGE CLAMP® is a universal, maintenance-free connection solution for all conductor types, featuring a winning design: both solid and fine-stranded conductors with ferrules can be directly inserted without the need for tools or any preparation, such as crimping the ferrule. Dimensions: 10.4 x 56.5 x 27.2 mm (width x height x depth). Depending on the conductor type, this female connector is ideal for conductor cross sections ranging from 0.25 mm² to 4 mm². There are two clamping points available for connecting two different potentials / two poles. The gray housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this female connector/socket. You can connect copper conductors thanks to front-entry wiring. You can secure connected conductors using the strain relief plate to make cables easier to handle..

Notes

Safety Information	According to EN 61984, pluggable connectors without current interrupting capacity must not be mated or unmated when live or under load.
