What is the ADP5250?

Bolster your benchtop with the biggest, baddest, and boldest Analog Discovery yet.

The ADP5250 brings higher sample rate and bandwidth and a more rugged design to the Analog Discovery Pro family, keeping our free highly rated WaveForms application software at the controls.

FREE US shipping on orders \$35+ >>

current and resistance measurement and a 300 V input range.

The Ultimate All-In-One Test System

Analog Discovery Pro devices feature a variety of advanced triggering options. Instruments within WaveForms can be cross-triggered, for example, by activating an oscilloscope capture based on a received and decoded digital protocol. In addition, external signals can trigger events using the dedicated external trigger input/output. Our free WaveForms software provides these features configurable in the instruments themselves, or for more control or automation in one of the available scripting interfaces.

Those familiar with NI will notice the hardware looks and functions similar to the VirtualBench VB-8012. The ADP5250 is NI quality hardware and connected to our tried-and-true WaveForms software suite for the ultimate test experience.

Note: The ADP5250 is Windows® only.
