1. Introduction

The LPDA.02.032111 Engager is a wide-band directional LPDA exterior antenna that operates within the 698-3900MHz frequency bands. It is an innovative and future proof solution, ideal for LTE 4G and 2G/3G networks as well as 2.4GHz Wi-Fi.

This wideband design eliminates the need to purchase different antennas for each frequency which simplifies installations since the same antenna can be used for a wide array of wireless applications where extensive coverage is desired.

The LPDA.02 has a 70° beam width in both orthogonal planes. The ABS external housing is robust, UV resistant and fully IP67 waterproof ensuring it is completely weatherproof and sealed. For various mounting options, it is supplied with tilt and swivel wall and pole brackets. The LPDA.02 has been tested for wind resistance up to 200 km/h

LTE 4G and 2.4GHz Wi-Fi applications demand high speed data uplink and downlink and where required, two LPDA.02 antennas can be mounted in space at 90° to create a MIMO arrangement.

Cable type, length and connectors are customizable for large order volumes. Please contact your regional Taoglas sales office for support.
