## NOTES:

1. Standard Tolerances:  
Assembly tolerance:  $\pm .010$ " (.25mm)  
Insulator length:  $\pm .005$ " (.13mm)  
Insulator width:  $\pm .005$ " (.13mm)  
Insulator height:  $\pm .005$ " (.13mm)  
Pin Length:  $\pm .005$ " (.13mm)  
Pin Diameter:  $\pm .002$ " (.051mm)  
Pin Angle:  $\pm 2^\circ$   
Co-planarity of SMT connectors: .005" (.13mm) up to 1" (25.4mm) in connector length  
Insulator Flatness: .005" (.13mm) up to 1" (25.4mm) in connector length
2. Per IEC 60512-11-(4,-9,-10,-12)
3. Mill-Max products labeled with the RoHS symbol are compliant with all three ROHS Directives. All of our products previously described as RoHS (2002/95/EC) and RoHS-2 (2011/65/EC) are also compliant with RoHS-3 (2015/863/EU).
4. Current rating is typically a measured function of the female socket/connector. The amount of current a solid, male, brass pin can tolerate is a direct relation of the heat displaced based on current and the ability of neighboring components to handle displaced heat.

## ADDITIONAL NOTES AND SPECIFICATIONS

In the interest of improved design, quality and performance, Mill-Max reserves the right to make changes in its specifications without prior notice. Specifications and tolerances are provided wherever possible. The tolerance on dimensions of critical to function features is typically held tighter than the stated standard tolerances, such as press-fits, holes and lengths affecting the coplanarity of SMT products. Due to the wide variety of interconnects Mill-Max offers, the specific tolerances vary from product to product. If you need information regarding the tolerance of a particular part, please contact Technical Services.
