

Sensor Foundation Kit

FREE SHIPPING! (US & Canada). Prices in US dollars.

Our Sensor Foundation Kit, a metal 'bento box', contains 14 plug & play components you can use with your pi-top [4], including programmable sensors, buttons, and LEDs.

The kit includes our Foundation Plate which attaches to your pi-top [4]. Plug components into the foundation plate and get started right away, following step-by-step tutorials to learn the basics of coding and physical computing. Then continue your learning by progressing into projects in advanced coding, robotics, cybersecurity, and AI.

You need a pi-top [4] to use our Sensor Foundation Kit.

The Sensor Foundation Kit includes:

- 1 x Foundation Plate
- 1 x Sound Sensor
- 1 x Light Sensor
- 2 x Buttons
- 1 x Buzzer
- 2 x Potentiometers
- 2 x Red LEDs
- 2 x Green LEDs
- 2 x Yellow LEDs
- 1 x Ultrasonic Sensor
- 8 x LEGO® Connectors
- Connecting cables
