What's the wire gauge used?

 **Santa Claus Impersonator** / about 2 months ago / ★ 1

Please refer to the datasheet under the **Documents** tab.

 **Ben A** / about 11 months ago / ★ 1

"wall mounted" is not the words you are looking for on this and several other adapters introduced May 2019.

 **Santa Claus Impersonator** / about 11 months ago * / ★ 1

We probably use the term "wall-mounted" because that is the name of the product as provided by the 3rd party vendor. However, I will ask to see if that can be modified to a more conventional name/search term.

 **Ben A** / about 11 months ago / ★ 1

Oh yeah, I see that. What were they thinking.

Also, apparently Unicode is broken in your comments? "test" Yup, definitely completely broken.

 **Santa Claus Impersonator** / about 11 months ago / ★ 1

I talked to a few people and we should be changing it to "wall adapter" or "wall power adapter" to match the names of similar products already listed in our catalog. Hopefully, that works better than "wall mounted".

Hmm.. interesting. It looks like you are using the left/right double quotation mark (U+201C and U+201D). I am not sure if it is a keyboard setting or browser setting, but I get a neutral quotation mark (U+0022) for my entries. The formatting syntax may only support certain characters... I'm unsure???
