Product Overview

Ratings & Reviews

WSA1M20000N Features

Data Center Operation: Server Access, 1 Month Software Support Contract, 20000 Nodes

7x24 telephone technical support

Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you require is available at any given time.

Service warranty certificate

Customers receive assistance from the Service Entitlements team to ensure their product is properly recorded. An e-mail Service Entitlement Certificate provides a detailed record of the service registration, along with the service expiration date.

Software upgrades

Software support contracts entitle customers to all software upgrades and updates, ensuring access to new features and product enhancements.

Data Center Operation: Server Access Features & Benefits

Manageability

One-to-many device control

View, configure and control multiple vendor's IT devices through one console for secure and easy server management.

Physical location

Provides visibility to exactly where your servers are placed within the data center for an accurate inventory and overview.

Software only KVM

Reduce costs by eliminating the need for hardware appliances in the data center.

Multi-vendor asset support

Provides support for multiple types of IT assets and hardware platforms.

Availability

Primary in-band management

Access both server OS and BMC through the primary network to solve any issues.

OS access

Connect to the operating system via RDP, SSH and VNC.

BIOS configuration

Access BIOS settings and configurations directly from the DCIM software to solve hardware problems preventing a server from booting normally.

Power cycling

Access servers remotely whether they are on or offline for instant control and reboot.

Server diagnostics

Provides access to server audit logs for analyzing and troubleshooting when the OS is unresponsive.

Access track and trace

Track and trace who and when servers have been accessed and controlled through the software KVM.

Secondary out-of-band management

Utilizes a secondary access path for reaching affected devices and solve any issues through the alternate business-critical network.

Consol access

Remotely control and manage IT devices through software KVM for lights out data center management.
