■ Application of introduction**1. DALI interface**

- Comply with IEC62386-102(2.0), IEC62386-207, IEC62386-209
- update Online,use smart key to connect PC and the driver to update the firmware.

2. MCS interface(MCS+/MCS-)

- MCS+ interface voltage 15V
- Max current setting(each step is 1 mA), default driving current defined as 350mA.
- Log or linear dimming curve,default setting is log dimming.
- NTC thermal management protects LED lamp,when the temperature of LED lamp over temperature protection point, the current will be reduced by 50% every 5 minutes. Default setting is 85°C.

- Control Dali bus 15V/100mA enable or disable, default setting is disable.
- Control the status of Auxiliary power when dim level =0. Enable standby mode: when dim level =0, the Auxiliary power will be closed. Disable standby mode: when dim level =0, the auxiliary power still can work. Default setting is enable.

3. Dimming performance

- When changed to any dimming level, flicker wouldn't occur,dimming would be achieved smoothly.
- In the range of 200~1500mA,the current operating in continuous mode; In the range of 0~200mA,the current operating in PWM dimming mode, and the PWM frequency 3.6KHZ.
