

RaspBMC Pack for Raspberry Pi - Includes IRKey & Remote

PRODUCT ID: 1563

DISCONTINUED

DESCRIPTION

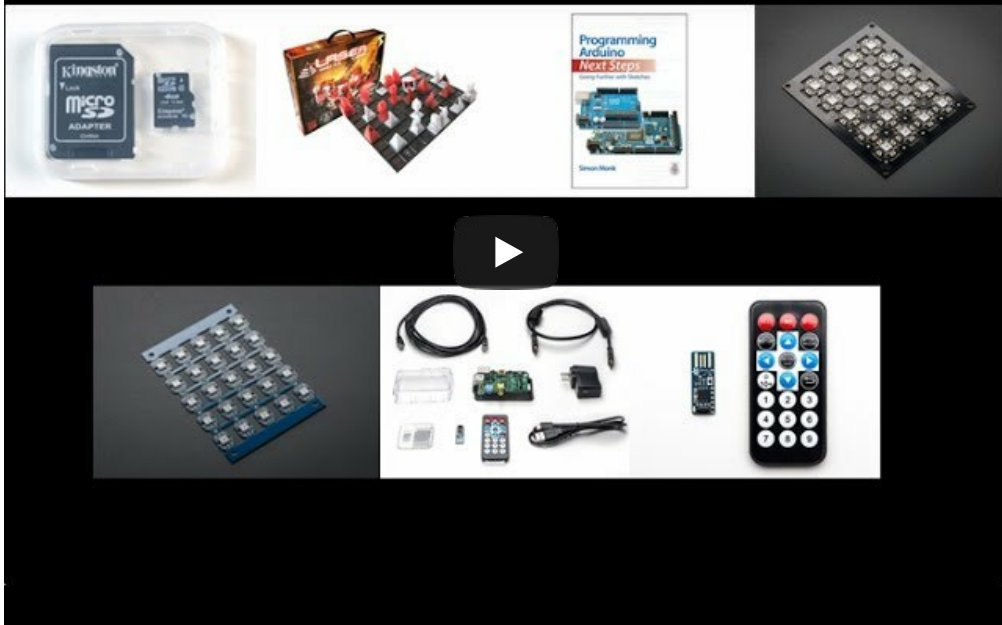

DESCRIPTION

Build your own all-in-one mini XBMC computer with this Raspberry Pi RaspBMC pack! You get everything necessary to start, plug it in and rock out with your very own open source set-top box. Watch videos, install apps, follow RSS feeds, etc.

To make this pack extra-fun we not only have the Pi and required accessories but also include an [Adafruit IRKey and IR remote](#). Plug the IRKey into the Pi USB port to control RaspBMC from your couch without the need for a keyboard. (Although, [if you're going to be doing heavy typing, you may want to pick up a wireless USB keyboard + touchpad](#).)

Each order comes with:

- [Raspberry Pi Model B](#) - has an Ethernet port, two USB ports and 512 MB of RAM. This is the model suggested for use with RaspBMC/XBMC
- [Adafruit Pi Case](#) - Keeps your Pi cozy and safe
- [10' Long Ethernet cable](#) - Ethernet is better than WiFi for streaming video, so we include a fairly long cable that you can plug into your home broadband router.
- [MicroUSB cable](#) - 3 feet long, great for powering your Pi
- [HDMI Cable](#) - 3 feet long, plug one end into your Pi and the other into your TV or monitor.
- [5V 1A power adapter](#) - specially designed for the Pi
- [4 GB SD Card with RaspBMC](#) - a 4GB card with the network RaspBMC image pre-installed and ready to rock. It will auto-magically download the most recent RaspBMC to finish the install once booted for the first time.
- [Adafruit IRKey with IR Remote](#) - Plug the IRKey into your Pi's USB port and you've got an IR Remote receiver that looks just like a Keyboard, designed for and works great with RaspBMC

RaspBMC Pack for Raspberry Pi - Includes IRKey & Remote ([13:21](#))
