Introduction

This DC 5.5*2.1 one female to three male power splitter is a convenient and cost-effective way to power up 3 DC devices with one power source.

Compatible with all DC5.5*2.1 connectors, it uses a tinned oxygen-free copper wire core which offers more stable transmission and effectively suppresses external signal interference.

The wire outer sheath employs PVC material which is insulated, anti-aging, corrosion-resistant, flame-retardant. Besides, the galvanized plug is wear-resistant and anti-oxidation, allowing repeated plugging and unplugging.

This power adapter is suitable for surveillance cameras, routers, set-top boxes, switches, power adapters, and other devices.

Specification

- Voltage: 24V
- Current: Main line 5A
