

TL900 SafeSense[™] CAT IV Fused Test Leads

Extech's UL approved SafeSense[™] technology senses the presence of voltage even with a blown fuse for increased safety. Standard shrouded banana-to-banana plug connectors fit most multimeter input jacks. These test leads are CAT IV safety rated with high quality dual-layered silicone construction cables. The built-in fuse in the test probe body is replaceable.

Features

- Intelligent UL approved SafeSense[™] technology makes it easy for user to know if voltage is present on target area being measured, even with a blown fuse, for increased safety
- Two dual-layered silicone test lead cables (5.3ft/1.6m long) with wear indication construction
- Standard 90° shrouded banana-to-banana plug connectors fit most multimeter input jacks
- Two CAT IV probes have built-in replaceable fuses (1000V, 11A, 20kA breaking capacity)
- CAT IV-600V, CAT III-1000V, 10A with protective safety cap
- Each probe has 2mm probe tip and includes a 4mm brass caged bayonet threaded tip (removable) for connecting accessories
