

3M™ Heat Shrink Tubing VTN-200

Modified Fluoroelastomer

Data Sheet

September 2019

Product Description

3M™ Heat Shrink Tubing VTN-200 is highly abrasion and cut-through resistant and can withstand a wide variety of fuels, lubricants, acids and highly corrosive fluids at temperatures up to 200°C. In addition to its high continuous operating temperature and chemical-resistance properties, this tubing is very flexible and is easily marked by hot-stamp or printwheel methods. When heated in excess of 175°C (347°F), 3M VTN-200 tubing rapidly shrinks to a skintight fit. 3M VTN-200 tubing is rated for continuous operation from –55°C (–67°F) to 200°C (392°F).

Typical Applications

Because of its excellent high temperature fluid performance, 3M VTN-200 tubing is often used to protect wiring and component covers in aircraft/aerospace applications including electronic control systems and hydraulic fluid transport mechanisms and in chemical plants.

Shrink Ratio

3M VTN-200 tubing has a 2:1 shrink ratio. When freely recovered, the tubing will shrink to 50% of its as-supplied internal diameter. The recovered wall thickness is proportional to the degree of recovery.
