The 8BitDo SN30 Pro Bluetooth Gamepad is the worlds first, fully featured retro controller. It boasts a full button set with clickable joysticks, rumble vibration, motion controls, wireless Bluetooth®, rechargeable battery, home and screen shot buttons, and a USB-C connector. Not to mention a proper d-pad. The 8BitDo SN30 Pro provides an easy-to-interface controller for your Bluetooth enabled robotics projects.

8Bitdo controllers are designed to be as versatile as possible with each of your modern devices. Easily pair your controller as an X-input or D-input device via Bluetooth® You can even use it as a wired USB controller with the included USB cable. The firmware is constantly being updated with new system compatibility like the Switch, Raspberry Pi, Retron5 and more.

**Note:** This 8BitDo SN30 Pro Bluetooth Gamepad is the *G Classic* edition.

★★★★★ **Comfortable, Responsible, works on RetroPie!**

about 2 years ago by **Member #123349**

I originally purchased this as a substitute for the SNES model controllers that connect to my RetroPie directly since I wanted to be able to play from a longer distance.

Not only does this fulfill that request, it is exceedingly well designed. It fits well on the hands, bluetooth has been stellar, and the amount of buttons available on it is great.

I purchased 2 and I've been satisfied with the result!
