Description

The PI3USB4000A is a 2-to-1 differential channel multiplexer/de-multiplexer switch. C0+/C0- pins can tolerate voltages up to 18V. Over-voltage protection (OVP) is implemented at 4.75V to immediately switch off the channels when over-voltage condition is detected. PI3USB4000A can pass USB2.0 signal with bandwidth 1GHz to maintain signal integrity and eye diagram open.

Applications

- Smart Phone, type-c application, Tablets, NB, PC
