The Breadboard Expansion for NI myRIO is a Limited Time product. Once the current stock is depleted, it will be discontinued in our store.

The MXP Breadboard provides a 300-tie breadboard & 50-tie bus bar on an expansion card compatible with the myRIO Expansion Port (MXP). The MXP Breadboard functions as an I/O breakout, with digital and analog signals mapped to two headers on either side of the breadboard itself. The MXP Breadboard's connector is also keyed to ensure correct connection with your NI myRIO.

Note:

For more information on the NI myRIO, please visit www.ni.com/myrio.
