

Jumper Wires Premium 12" M/F Pack of 100

PRT-09386 ROHS ✓

DESCRIPTION

This is a SparkFun exclusive! These are 12" long jumper wires terminated as male to female. Use these to jumper from any male or female header on any board. Multiple jumpers can be connected next to one another on a 0.1" header. Comes in five packs of twenty jumpers (colors shown).

We use these wires for everything! They work great with breadboards, Arduinos, and really any 0.1" pitch prototyping board.

These things are amazing when you need to jump male header pins to a protoboard or breadboard. Used them for our senior design project to prototype and it allowed for things to be organized by using the different colors for different peripherals. Pretty handy when you are using a 208 pin micro controller and the pins for the ports are spread out everywhere. Downside is they are a bit expensive, but all of these type of wires I have purchased from sparkfun are really nice.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
