Documentation / Firmware >

Certified Multi-Port Wired IoT Gateway for Medical Devices

- UL and IEC-60601 compliance provides galvanic port isolation to protect connected medical devices
- Securely connect any medical device with a serial interface to the network using enterprise-level SSL and SSH
- Simple set up and configuration with industry-standard management tools including Web, CLI, XML powered by **MACH10**
- Gigabit Ethernet offers increased bandwidth for higher performance
- Available with 4, 8 or 16 ports

Click on a cart button below to buy direct from Lantronix.

- **Call (800) 422-7055** to speak with a Lantronix sales representative in North America.
- **Lantronix Worldwide Offices** – Find an office in your region from our list of worldwide offices.
- **Find a Lantronix Partner** – Lantronix products are available from a variety of leading technology vendors.

*The Device Server can be upgraded to Device Gateway with the latest Firmware.
