FEATURES

This is the Antenna Kit for the Raspberry Pi 4 Compute Module wireless variants. The "duck" style antenna adds range to the wireless radio on the wireless enabled Compute Modules. Something quite desirable if you're working in industrial environments or other places a Compute Module would be used and

the potential for signal interference is present. The antenna connects to the board

via the press-fit U.FL connector on board the compute module (see photos for

more details). This kit contains an antenna, bulkhead fixture, and SMA to U.FL Cable.

Raspberry Pi 4 Compute Module Antenna Kit Product Help and Resources

SKILLS NEEDED

Core Skill: Electrical Prototyping

If it requires power, you need to know how much, what all the pins do, and how to hook it up. You may need to reference datasheets, schematics, and know the ins and outs of electronics.

Skill Level: Noob - You don't need to reference a datasheet, but you will need to know basic power requirements. See all skill levels
