StruxureWare Data Center Expert Features & Benefits

Protection	
Customizable user access	Define user access and viewing capabilities to individual groups. Control access to devices by administrator-defined user accounts. Additional user access can be managed by using the built-in LDAP and Active Directory Support.
Encrypted communications	128 Bit, SSL encrypted communications between client and server, as well as encrypted user IDs and passwords stored on the server to help protect your resources
Remote monitoring support	Web-based service that serves as a second set of eyes into the health of a company's physical infrastructure. Experienced professionals work non-stop to provide 24-hour monitoring and to help diagnose problems before they become critical.
Availability	
Graphical trending analysis	Access current and historic data for any device or group of devices. Plot and graph multiple data points in a logical correlation to visualize potential hazardous trends.
Custom reporting	Create, save and schedule user-defined reports for ease of data collection, distribution and analysis.
Centralized Alert Repository	Access historical alerts from several appliances through one central database. Sort alerts by type, date, appliance, and/or device group.
Integrated data storage	StruxureWare Data Center Expert ships with internal storage for data and video collection. Additional storage can easily be made available using the built-in Network Attached Storage server support for long-term storage and archiving.
Localized user interface	Provides a localized user interface including alerts and alert descriptions in 10 local languages
Agility	
Mass firmware update	Decrease set-up time and complexity of managed devices by simultaneously upgrading firmware for multiple APC devices.
Custom mapping	Custom backgrounds, unique user-assignable icons, and drag-and-drop device placement make it easy to identify problem devices at a glance, minimizing downtime, errors, and cost.
Auto-discovery	Reduces the time needed to install and deploy physical infrastructure devices by automatically detecting manageable devices on your network.
Mass Configuration	Provides a comprehensive mass configuration capability, allowing users to create, save, and push configurations or specific device settings to similar APC devices with a Network Management Card.
Private networking	Reduce IP addresses needed on the public network to manage devices, by placing them on an isolated secure network.
Advanced device grouping	Define user access and viewing capabilities to individual groups. Control access to devices by administrator-defined user accounts. Additional user access can be managed by using the built-in LDAP and Active Directory Support.
Adaptability	
Extendable architecture	Available node and application license keys extend the capabilities of the platform allowing it to grow to meet changing business needs.
Web services API	Provides the ability to integrate StruxureWare Data Center Expert data and events into existing IT applications and tools capable of making web services calls.
Surveillance add-on application	Enhance visibility of your critical assets with physical threat management to monitor and record all activity in secured areas. A centralized repository allows the user to review, search and tag surveillance events for future needs.
Add-on modbus TCP output module	Integrates data and select events from devices managed by StruxureWare Data Center Expert into an existing Building Management Systems through ethernet transmission.
Integrates with StruxureWare Management applications	Achieve integrated energy efficiency, predictive planning and real-time data center operations through the add-on StruxureWare Data Center Operation applications.
Manageability	
Multi-vendor device support	Extensive multi-vendor support for monitoring networked SNMP devices. Enable visibility of existing SNMP devices through threshold alert notifications, data trending and reporting.
Fault notification	Real-time event notification minimizes response times to critical physical infrastructure situations. Enables IT Administrators to reduce mean time to repair, improve efficiency, and maximize uptime.
Real-time monitoring	Immediate visibility to your entire physical infrastructure through centralized, real-time device monitoring and notification enabling quick assessment of events as they occur.

Centralized management	Simplify data center infrastructure management by using a centralized repository accessible from anywhere on the network through a powerful and easy-to-use console application.
Free text search	Quickly locate devices and alerts through the free search field.
Alarm filters	Customize the user interface to display devices in critical, warning or normal device statuses.
NMS Integration	Integrate SNMP traps into an Enterprise Management System, allowing users to view alerts generated by devices managed by StruxureWare Data Center Expert.
Unified console	Customizable Windows and Linux client application enables instant access to StruxureWare Data Center Expert application from anywhere on the network.
