# maxiFLOW™ Cross Cut High Performance Heat Sinks with Metal Push Pin

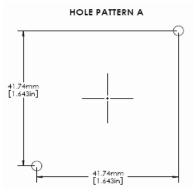

## ATS PART # ATS-1040-C2-R0

## **Features & Benefits**

- » For larger heat sinks and higher pre-loads, push pins with compression springs are an effective mounting choice. The push pin has a flexible barb at the end that is designed to engage with a pre-drilled hole in a PWB. The compression spring adds the necessary force to hold the assembly together. Provides better thermal performance than comparable size straight fin and pin fin heat sinks
- » Features proven high performance maxiFLOW™ heat sink spread fin array to maximize cooling surfaces
- » Ideal for tight spaced components where wider heat sinks can't be used
- » Provided with pre-assembled thermal interface material centered on base
- » Brass push pin with steel compression spring
- » Reccomended through hole size in PCB is 3.00 mm
