IOIO and Breadboard Holder

● DEV-11632 ROHS ✔

★★★★★ 1

DESCRIPTION   INCLUDES

This holder allows you to safely secure a IOIO development board and a self-adhesive breadboard in place to easily run jumper wires in between the two to form simple or complex prototyping circuits. Unlike it's cousin, for the Arduino, this IOIO and breadboard holder has been made specifically for use of the IOIO development board

This prototyping holder includes two screws for mounting your IOIO dev board. The self-adhesive breadboard that fits this plate can be found in the related items below.

IOIO and Breadboard Holder Product Help and Resources

SKILLS NEEDED

Core Skill: **DIY**

Whether it's for assembling a kit, hacking an enclosure, or creating your own parts; the DIY skill is all about knowing how to use tools and the techniques associated with them.

Skill Level: Noob - Basic assembly is required. You may need to provide your own basic tools like a screwdriver, hammer or scissors. Power tools or custom parts are not required. Instructions will be included and easy to follow. Sewing may be required, but only with included patterns.

★★★★★ **At least it's a breadboard holder**

about 7 months ago by suntop ✔ **verified purchaser**

Seems like Sparkfun is overstock with this stuff and trying to get rid of it ! , that's literally free, grab a few of these to round up your payment. Attach any of your stick like mcu dev board and you are good to go.

Possible use case :

Arduino Nano/Mini/Micro prototyping

Mini Robot Base by drilling and attaching wheels

Hot glue your project in the flat bottom side

Make a project enclosure super gluing 6 of these

Use your imagination, you will find lots of use cases !

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
