PCB terminal block, 2059 Series, with 3 mm pin spacing

Connect conductors quickly and easily with this PCB terminal block (item number 2059-301/998-403). It offers the flexibility needed for different mounting types. Our PCB terminal block is rated for 160 V and is designed for use with a rated current of up to 3 A. Strip lengths must be between 4 mm and 5.5 mm when connecting conductors to this PCB terminal block. Featuring one conductor terminal along with PUSH WIRE®, this connector is highly versatile. Our PUSH WIRE® connection uses the stiffness of the conductor to overcome the clamping spring's contact force, allowing faster and easier conductor clamping. The dimensions are 2.9 x 2.7 x 7.9 mm (width x height x depth). This PCB terminal block is suitable for conductor cross sections ranging from 0.14 mm² to 0.34 mm² on one side and for conductor cross sections ranging from 0.5 mm² to 0.5 mm² on the other side. It comes with one level and a clamping point that you can use to connect a single potential / 1 pole. The white housing is made of polyphthalamide (PPA GF) for insulation and the contacts are made of copper alloy. The contact surface is coated with tin. An operating tool is used to operate this PCB terminal block. SMD is used to solder the PCB terminal block. The conductor is designed to be inserted into the board at a 0° angle..

Data Sheet | Item Number: 2059-301/998-403 https://www.wago.com/2059-301/998-403

Notes	
Note	Application notes: Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260°C peak temperature. Due to application-specific variables (component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.
	Depending on reflow soldering temperatures and times, color deviations may occur. These deviations will have no impact on functionality.
Recommendation	Recommendation for stencil: 150 µm material thickness; Pattern layout identical to solder pad layout

Limit temperature range -60 +105 °C	Environmental Testing	
	Test specification: DIN EN 50155 (VDE 0115-200):2022-06 Railway applications – Rolling stock – Electronic equipment	
		Test procedure: DIN EN 61373 (VDE 0115-0106):2011-04 Railway applications – Rolling stock equipment – Vibration and shock tests
		Spectrum/Mounting location Service life test, Category 1, Class A/B
		Functional test with noise-like oscillations Test passed according to Section 8 of the standard
		Frequency $f_1 = 5 \text{ Hz to } f_2 = 150 \text{ Hz}$
		Acceleration 0.101g (highest test level used for all axes)
		Test duration per axis 10 min.
		Test directions X, Y and Z axes
		Monitoring of contact faults and interrup- Passed tions
		Voltage drop measurement before and Passed after each axis
	Simulated service life test through increased levels of noise-like oscillations Test passed according to Section 9 of the standard	
		Frequency $f_1 = 5 \text{ Hz to } f_2 = 150 \text{ Hz}$
		Acceleration 0.572g (highest test level used for all axes)
		Test duration per axis 5 h
		Test directions X, Y and Z axes
		Extended testing: Monitoring of contact Passed faults and interruptions
		Extended testing: Voltage drop measure- Passed ment before and after each axis
	Shock test Test passed according to Section 10 of the standard	
	Shock pulse form Half sine	
	Acceleration 5g (highest test level used for all axes)	
	Shock duration 30 ms	
	Number of shocks (per axis) 3 pos. und 3 neg.	
	Test directions X, Y and Z axes	
	Extended testing: Monitoring of contact Passed faults and interruptions

Installation Notes

Conductor termination

Insert solid conductors via push-in termination.

Conductor termination

Easy conductor removal, e.g., via operating tool (Item No. 206-859) or "twist & pull" (max. 10 x, no reconnection of smaller conductors possible)
