

Indicating Blade Fuses and In-Line Fuse Holders

Find blown fuses fast with *easyID*™

LED technology helps identify a blown fuse.

Product description:

The Bussmann line of *easyID*™ illuminating blade fuses and holders use LED technology to indicate that a fuse has opened, making it easy to spot in fuse panels tucked up under dark dashboards.

Illuminating blade fuses are the ideal choice for fast and easy fuse replacement. Three popular blade fuse types (ATM, ATM, Maxi) are available in common fuse ratings for consumer convenience.

ATM fuses are popular for a wide application involving late-model OEM vehicles, while ATC fuses are widely used by automotive OEMs.

Used for protecting circuits in wiring harnesses (usually found under the hood, in a fuse panel or supplementary panel near the battery) Maxi fuses are increasingly used in domestic cars and some imports.

Features and benefits:

- Available in popular sizes and ratings to cover the most common replacement fuse needs.
- Illuminating fuse holders use regular ATM and ATC blade fuses.
- Universal color coding makes it easier to match with a traditional non-illuminating fuse.
- Value packs, assortment and service kits provide popular packaging options to maximize retail sales.
- Specialty (black) packaging helps fuses stand out in any retail setting as being the superior choice.

Bussmann is now a part of Eaton. Same great products plus even more. Learn more at www.eaton.com/cooper.
