| Product Overview                    | Technical Specifications                                                                                                                                          | Ratings & Reviews |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| MGE Galaxy 4000 Features & Benefits |                                                                                                                                                                   |                   |
| Manageability                       |                                                                                                                                                                   |                   |
| Network manageable                  | Provides remote power management of the UPS over the network.                                                                                                     |                   |
| LCD graphics display                | Text and mimic diagrams that display modes of operation, system parameters and alarms.                                                                            |                   |
| Multiple distribution options       | Superior design flexibility enables a wide range of customer requirements to be addressed.                                                                        |                   |
| Two 42 Postion Power Panels         | Provides breaker positions for distribution to racks and power zones                                                                                              |                   |
| Serviceability                      |                                                                                                                                                                   |                   |
| Multiple levels of service          | With the option of packages or individual service components, our services are structured to allow you to pick and choose what you would like APC to do for you.  |                   |
| 7x24 telephone technical support    | Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it. |                   |
| Front-access servicing              | Simplifies installation and UPS maintenance while minimizing space requirements.                                                                                  |                   |
| Availability                        |                                                                                                                                                                   |                   |
| Power conditioning                  | Protects connected loads from surges, spikes, lightning, and other power disturbances.                                                                            |                   |
| Frequency and voltage regulation    | Gives higher application availability by correcting poor frequency and voltage conditions without using the battery.                                              |                   |
| Generator compatible                | Ensures clean, uninterrupted power to protected equipment when generator power is used.                                                                           |                   |
| Dual mains input                    | Increases availability by allowing the UPS to be connected to two separate power sources.                                                                         |                   |
| Automatic internal bypass           | Supplies utility power to the connected loads in the event of a UPS power overload or fault.                                                                      |                   |
