

# Multilayer Ceramic Chip Capacitor

**Part Number:** 060332000102JXT

**Description:** 0603 200Vdc 1.0nF  $\pm 5\%$  X7R - Non Mag (CTI  $\geq 600$ )

A range of X7R and X5R MLC capacitors with a guaranteed non-magnetic / relative permeability of 1.000 for critical applications such as NMR / MRI. Available with a variety of termination options including FlexiCap™, the world's first commercially available flexible termination.

AF9 suffix parts using palladium silver (PdAg) termination are unplated, suitable for mounting using conductive adhesive.

## Mechanical Specification

Size Code	0603
Length (L1) in mm (")	1.6 +0.25/-0.15 (0.063 +0.01/-0.006)
Width (W) in mm (")	0.8 $\pm$ 0.15 (0.032 $\pm$ 0.006)
Thickness (T) in mm (")	0.9 Max (0.035 Max)
Minimum Termination Band (L2,L3) in mm (")	0.20 (0.008)
Maximum Termination Band (L2,L3) in mm (")	0.40 (0.016)
Termination Material	FlexiCap™ Polymer termination, Copper barrier, Sn Plated Solder (Non-Mag, RoHS compliant)
Solderability	IEC-60068-2-58
Packaging	7" Reel Horizontal Orientation, 4000 per reel

## General Electrical Specification

Rated Voltage	200Vdc
Nominal Capacitance Value	1.0nF
Capacitance Tolerance	$\pm 5\%$
Tangent of Loss Angle (Tan $\delta$ )	$\leq 0.025$
Capacitance and Tan $\delta$ Test Conditions	1.0Vrms @ 1kHz
Voltage Proof (Voltage applied for 5 secs max. @ 50mA max. charge current. 50% Max, RH)	500Vdc
Min Insulation Resistance (IR)	100.00GOhm @ 100Vdc
Dielectric Classification	X7R - Non Mag (CTI $\geq 600$ )
Rated Temperature Range	-55°C / +125°C
Maximum Capacitance Change over Temperature Range	No DC Voltage $\pm 15\%$ Rated DC Voltage -
Climatic Category (IEC)	55/125/56
Ageing Characteristic	<2% per decade (nominal capacitance is 1000 hour value)

## Environmental

RoHS Compliant to 2011/65/EC as amended by 2015/863/EU

Compliant

REACH Compliant

247 compliant

California Proposition 65

No exposure risk

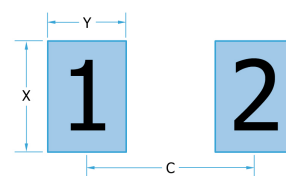

## Board Layout

Knowles' conventional 2-terminal chip capacitors can generally be mounted using pad designs in accordance with international specification IPC-7351, Generic Requirements for Surface Mount Design and Land Pattern Standards, but there are some other factors that have been shown to reduce mechanical stress, such as reducing the pad width to less than the chip width. In addition, the position of the chip on the board should be considered.

Some high voltage parts may require modifications to the board layout and/or the addition of a conformal coating to prevent flashover, especially under high humidity conditions. Board cleanliness and environmental conditions can also impact this. Refer to application note AN0043 for further information.

### IPC-7351 pad design

	0603	
C	1.60mm	0.063"
Y	0.85mm	0.033"
X	1.00mm	0.039"

## Packaging

Tape packaging information for tape-and-reel parts:

Tape and reel packing of surface mounting chip capacitors for automatic placement are in accordance with IEC60286-3.

## Soldering

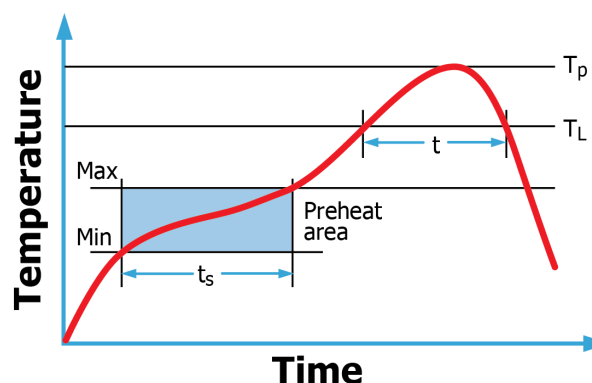

Reflow solder in accordance with IPC-A-610. Recommended reflow profile as laid down in IPC/JEDEC J-STD-020.

Wave soldering is also possible, but care must be taken for case sizes 1210 and larger and component thickness  $> 1.0\text{mm}$ . Trials are encouraged.

Hand soldering is not recommended and can lead to component damage through thermal shock.

PdAg terminations are primarily intended for conductive epoxy attachment - they may be suitable for soldering but trials are recommended.

Application notes with mounting and handling guidance are available on request.

## DC Bias Characteristics

VCC Characterization

% Capacitance Drift with Time

The curves represent the 'typical worst case' curve – i.e. the typical curve of a 'worst case' component having the most capacitance loss delivered against the specification.

Knowles Precision Devices reserve the right to substitute any component with a similar component of the same or higher specification. In some cases this may mean that the capacitance drop with applied voltage is, in practice, less than the curve shown
