

World Class RF IC from China

RDA5215 Module for PHS

Download: Enter for product catalog

Sample application

The RDA5215 includes a power amplifier and an antenna switch. The PA and the switch are manufactured on HBT process and HEMT process respectively. This chip is designed for PHS handheld digital cellular equipment in the 1880~1930MHz band. The package of this chip is 3.3x3.3mm² MLPQ with 16 pins.

Features

- *PA + Antenna Switch
- *Advanced HBT and HEMT process
- *Input/Output matched @ 50 Ω
- *23.5dBm linear output power
- *Good linearity
- *Low supply voltage (3.4~4.2V)
