Bifurcated contacts with excellent electrical conductivity/SH-4, SH-5

■ Description

SH series industrial relays are designed to increase contact reliability and make them easy to use.

The relays' highly reliable, bifurcated contacts allow them to be used in low-level circuits of 5V, 3mA.

Various optional function units such as auxiliary contact blocks, coil surge suppression units can be added to the relays, allowing fast and field modification.

■ Types and ratings

Type	SH-4				SH-5		
Pole (No. of contacts)	4				5		
Contact arrangement	4NO, 3NO+1NC, 2NO+2NC				8NO, 7NO+1NC, 6NO+2NC 5NO+3NC, 4NO+4NC		
Thermal current (A)	10				10		
Rated operational current (A)	Volts	AC-15 (ind.)	AC-12 (res.)	Volts	DC-13 (ind.)	DC-12 (res.)	
	110V AC	6	10	24V DC	3	5	
	220V AC	3	8	48V DC	1.5	3	
	440V AC	1.5	5	110V DC	0.55	2.5	
	550V AC	1.2	5	220V DC	0.27	1	
Standard operating coil voltage	100V 50Hz/100–110V 60Hz, 200V 50Hz/200–220V 60Hz, 380V–400V 50Hz/400–440V 60Hz						
Mechanical durability	10 million operations						
Electrical durability (AC-15)	500,000 operations (at operational current)						
Operating cycles per hour	1,800						
Ambient temperature	–5 to +50°C

Industrial Relays

SH series

General information

■ Optional units

• Front mounting

Auxiliary contact block

2 or 4-pole

Highly reliable bifurcated contact can be used in low-level circuit of 5V, 3mA.

Operation counter

This counter indicates the number of relay ON-OFF operations to ensure easy maintenance and inspection.

Terminal cover

The relay can easily be fitted with terminal covers for finger safety.

• Top mounting

Coil drive unit

This unit controls ON-OFF operation for industrial relay with output from electronic equipment.

Coil surge suppression unit

This unit absorbs coil surge voltage due to relay ON-OFF operations.

• Side mounting

Auxiliary contact block

2-pole (1NO+1NC)

• Separate mounting

Off-delay release unit

This industrial relay can be held in closed position even when the instantaneous power failure occurs.

Easy modular system

Standard type industrial relays

Description

They are compact and highly efficient and have a long service life, and are suited for industrial electrical control applications. Typical applications include machine tools, process lines, conveyors and automatic and semi-automatic equipment.

The maximum contact ratings are 550 volts AC and 220 volts DC. Operating coils with rating of up to 600 volts AC are available.

Features

- Mounting compatible with conventional SRC50 series industrial relays
- Employing of bifurcated contact to increase high contact reliability in low-level circuit use (5V, 3mA) and single button auxiliary contact applicable for large current circuit use.

- Variety of optional function units available
Auxiliary contact block (2 or 4-pole)
Off-delay release unit
Coil surge suppression unit
Operation counter

- Snap-on 35mm IEC and DIN rail mounting available
- Meets JIS, IEC, BS, NEMA and VDE Standards
UL, CSA, TÜV, CCC, BV and LR approved
- Terminal numbers meet IEC

Notes:

- Both front mounting and side mounting auxiliary contact blocks cannot be mounted on a relay at a time.
- Any auxiliary contact blocks cannot be mounted on 8-pole type SH-4 and SH-4H relays.
- Side mounting contact blocks (SZ-AS1), with bifurcated contacts, can be mounted on SH-4H and SH-5H.

■ Ordering information

Specify the following:

1. Ordering code

■ Dimensions, mm
SH-4, 4H/4-pole

Mass: 0.32kg

■ Contact arrangement

SH-4, 4H/8-pole

Mass: 0.36kg

SH-5, 5H/5-pole

Mass: 0.34kg

Notes on panel drilling
• Use the two mounting holes on a diagonal line to mount a relay.
• Mounting holes indicated by ① and ② are compatible with those of SRC type.
• Mounting holes indicated by ③ conform to IEC Standards.

Industrial Relays

SH series

DC-operated type

DC-operated industrial relays

■ Description

The operating coil is a DC type instead of AC and is energized by a DC power source.

The coil ratings from 24V DC to 220V DC. The maximum contact ratings are 550V AC or 220V DC.

These relays are typically used where DC is used as a power source on switchboards. Where AC is used as a power source, sequence control is frequently lost due to the troubles such as power failure or momentary voltage drop.

In the case of DC-control, a battery power supply is frequently used because it is not susceptible to external influences. DC-operated relays are highly suitable for important control applications.

■ Features

- Employing of bifurcated contact to increase high contact reliability in low-level circuit use (5V, 3mA)
- Variety of optional function units available

■ Contact ratings

Industrial Relays

SH series

Off-delay release type

Off-delay release industrial relays

■ Description

This type of control relay has a capacitor connected in parallel with the operating coil, and the contacts are released with a delay of 1 to 5 seconds after the coil has been de-energized. If a momentary voltage drop or a power failure in AC control power supply of standard type control relay takes place, the operating coils are de-energized. Reclosing of the contacts must be carried out every time. The off-delay release relay is so designed that in the event of a brief power outage the coil will not release the contacts and control sequence is maintained.

■ Operation

The power supply is fed to the rectifier which in turn charges the capacitor. When a power failure takes place, the discharge current flows into the magnetic coil which holds the relay closed for 1 to 5 seconds. When the switch (SW) is opened the contacts will immediately open without delay.

(OFF-delay release unit)+(Relay)

Mechanical latch industrial relays

■ Description

Mechanical latch relays are used where operating sequence continuity must be maintained regardless of any outside interruptions, such as power failures or momentary voltage drop.

These relays are provided with two coils.

One is a closing coil (CC) and the other is a trip coil (TC). An interlocking circuit is provided between the CC coil and TC coil. Since no coil voltage is applied during operation it is extremely economical and also quiet.

■ Operating method

● Closing

When the closing coil is energized the latch mechanism interlocks to latch and the NC contact connected in series with the closing coil opens and the coil is de-energized.

Operating notes

- When carrying out a sequence operating check make sure that the load is disconnected.
- The electrical signal time for closing and tripping should be 0.3 sec. or more.
- Both the closing and tripping coils are short time rating.
Closing coil: Max. 30 seconds
Trip coil: Max. 15 seconds
- Since the relay and the latch mechanisms are adjusted at the time of assembly, do not strip nor replace the contacts in the field.
- If current is applied simultaneously to both the closing and tripping circuits, the coils may be heated and damaged. An interlocking circuit is required to prevent this.

■ Types and ordering code

• Rated operational current: Same as standard type, see page 03/3.

■ Coil ratings

Type	Operating coil Voltage	Code	Power consumption				Minimum energized time	Time rating		Operating voltage range
			AC operated Closing	Tripping	DC operated Closing	Tripping		Closing	Tripping	
SH-4/V	100V/100–110V AC 50Hz/60Hz	1	95VA	150VA	7W	150W	0.3 sec.	30 sec.	15 sec.	0.85 to 1.1 times coil rated voltage
SH-5/V	200V/200–220V AC 50Hz/60Hz	2								
SH-4/VG	100V DC	1								
SH-5/VG	110V DC 200V DC 220V DC	H 2 M								

Note: Coil voltage range from 24V to 220V AC and 24V to 220V DC is available.

● Tripping

When the trip coil is energized the latch is released and tripping is carried out by means of the back spring. At this time the NO contact connected in series with the tripping coil opens.

■ Performance data

- Mechanical durability: 1 million operations
- Electrical durability: 500,000 operations (at AC-15 rated operational current)
- Operating cycles per hour: 1200
- Allowable ambient temp.: -5°C to +50°C

■ Ordering information

Specify the following:

1. Ordering code

Notes:

- Mechanical latch units cannot be sold separately.
- Do not detach mechanical latch units from relays and do not make modifications such as attaching mechanical latch units to other industrial relays.

■ Manual operating sequence

Closing: Press the button in the direction of the arrow.

Tripping: Push the lever in the direction of the arrow.

Industrial Relays

SH series

With extra pick-up operating coil

Industrial relays with extra pick-up operating coil

■ Description

Generally, ordinary control relays are designed to operate within 85–110% of the rated voltage. However, relays with extra pick-up operating coils have a wider operating range of 75–110% of their normal rated voltage. They are used where the control power source is low and occasional voltage drops can be expected. Their performance is dependable in spite of low voltage conditions. Their outer dimensions and performance are similar to the standard type relay. They have a mechanical durability of 2.5 million operations.

■ Ordering information

Industrial Relays

SH series

With quick terminals

Industrial relays with newly developed quick terminals

Description

The product and terminal structure comply with international safety standards. It complies with VGB4, DIN57106, and VDE0106 Teil 100 which are recommendation for preventing the exposure of charging current part. Components such fork crimp terminals, and ring crimp terminals are inserted and secured by tightening the terminal screw. See Figures 1 to 3.

Features

- Easy wiring
Wiring time is at least 50% shorter than the conventional screw type terminal.
- Safety
The finger protection feature protects the charging current part during maintenance and check (complying with EN60947-4-1, and IEC60947-4-1)

DC operated slim type card relays

Rated thermal current 5 Amps.

Description

The RB104 and 105 relays are designed for printed circuit board use. These relays are extremely thin (5mm) and so, can be densely mounted on PC boards. As a result, PC board size and cost can be greatly reduced. Employing of bifurcated contacts ensure high contact reliability, allowing the RB104,105 relays to be used in low-level circuits. Coil voltages are available in ranges from 4.5V to 24V DC.

Features

- Thin, miniature size and light weight
The mounting space on the PC board can be reduced.
- UL, CSA and TÜV approved
- Low power consumption
They can be operated by means of non-polarity magnet.
- SIL terminal arrangement
SIL (Single-side In-Line lead) package allows the relays to be mounted easily on PC board.
- Fluxtight construction
- Immersion cleanable

Industrial Control Relays

Relays-and-terminal module

RS type

Relays-and-terminal module RS4□, 6N

A very compact, space-saving terminal module containing four or six relays with one NO contact.

■ Features

- The RS series relays-and-terminal module consists of four or six plug-in relays (RB105, 1NO contact or RB011, 1NC contact) and a terminal module with screw terminals. This relays-and-terminal module is ideal for interfacing electronic control devices (such as PLCs or photoelectric sensors) with output devices (such as solenoid valves and magnetic contactors).
- The use of ultra-small, high-sensitive relays has realized a compact size of

34mm wide and 69mm long, including screw terminals (RS4N type).

- Input terminals are located in the upper part and output terminals in the lower part of the module to separate them from each other, thereby making wiring easy.
- The terminal module uses RB105 or RB101 card relays. For replacement, please specify the card relay type and coil voltage.
- Built-in coil-surge suppression diodes and operation indicator LEDs simplify circuit design and maintenance.
- The module is quickly-mountable on a DIN 35mm rail.
- The RS4N module includes two standard accessory jumper plates, which are convenient for common wiring of terminals.

■ Relay remover

To remove a relay from the terminal module, use the type TY3 relay remover sold separately. Pull the relay in a direction perpendicular to the terminal module surface. Incorrectly removing or mounting a relay may damage the relay pins and pin jacks of the module.

TY3(RZ3A)

AF93-206

Industrial Control Relays

Relays-and-terminal module

RS type

Relays-and-terminal module RS16

16-point relays-and-terminal module with the smallest width in its class

■ Features

- Most compact in its class
Outside dimensions are 110mm (W), 52mm (D), and 37mm (H).
The width is the smallest in this class.
- Push-to-set (quick-connect) terminals for easy wire connection
A unique terminal structure enables quick and easy crimp terminal connections without removal of screws. (No more lost screws)
- Clear LEDs indicate relay output status.
Each relay has an LED to indicate its ON/OFF status.
- A surge suppressing diode is provided for each relay coil.
- Terminal cover with label for marking device Nos.
- Built-in relay remover
- DIN rail quick mount and panel-surface mount using screws

■ Type number nomenclature

- Ordering information
- Specify the following:
1. Type number

■ Types

Type	Input/output	No. of poles	Rated voltage	Connector side polarity
RS16-□04	Output	16(1NO×16)	5V DC	NPN type (+common)
RS16-□04P			24V DC	PNP type (-common)
RS16E-□04	Input			NPN type (+common)

Note: Enter the rated voltage code in the □ mark as follow. 5V DC: DY, 24V DC: DE

■ Ratings

● Operating coil

Rated voltage	Rated operational current (mA)	Coil resistance (Ω)	Pick-up voltage	Drop-out voltage	Power consumption (W)
24V DC	8.3	2,880±10%	70% or less of coil rated voltage	10% or more of coil rated voltage	0.2/1NO contact
5V DC	40	125±10%			3.2/16NO contacts

Note: An LED flows approx. 1mA. To calculate the power requirements, calculate the total coil and LED currents of all relays installed in the terminal module.

● Contact

Terminal relay type		RS16 (output)	RS16E (input)
Rated current	220V AC (Res. load)	2A	—
	220V AC (Ind. load)	2A	—
	24V DC (Res. load)	2A	1A
	24V DC (Ind. load)	2A	1A
Rated thermal current*		2A	1A
Electrical durability (operations)		200,000 at 200V AC, 2A 300,000 at 24V DC, 2A	
Mechanical durability (operations)		20,000,000	

Note * The contact current rating of the RB105 relay used in this module is 5A. The thermal current rating of this terminal module, however, is 2A or 1A due to limitations of the terminal module (RS16) rating.

■ Performance data

Operating time		10ms or less
Release time		10ms or less
Vibration	Malfunctions durability	10–55Hz 1mm double amplitude

■ Dimensions, mm

Industrial Control Relays

Relays-and-terminal module

RS type

Relays-and-terminal module with SSR output

■ Features

- SSR output (AC and DC)
Provided with a miniature SSR with the same dimensions as the RB-series miniature card relay resulting in a longer service life and making it ideal for highly frequent switching.
- Slim 34-mm body
Slim 34-mm design for all models up

■ Type number nomenclature

to 16-pole models allowing significant space savings within the panel.

- Both surface mounting and DIN rail mounting are possible
- Provided with operation indicators
- Easy relay maintenance with special socket (type TP04)
- RZ4N finger protector also available. (Sold separately.)

RZ finger protection cover for RS series relays-and-terminal module

■ Features

- Ensures safety and prevent dust
This cover prevent persons from touching, by mistake, live conductor parts of the terminal module and receiving an electric shock. The cover also protect relays from dust.
- Hold the relay remover
The cover surface has two holes to hold the type TY3 relay remover. When the remover is not being used, it can be attached to the cover so that it is not lost.
- The cover is quick-mount
The cover can be quickly mounted on or removed from the TP04 socket used with RS series relays-and-terminal module.
- The cover can be mounted at any time
The cover can be mounted on or removed from the socket at any time before or after wiring the terminals.
- Crimp terminal is also available
It is possible to use a crimp terminal as well as terminal jumper for wiring.

■ Dimensions, mm

Mass: Approx. 3.2g

Industrial Control Relays

Relays-and-terminal module

RS type

■ Notes on use

● Mounting direction

This product can be mounted in any direction. However, to mount the product in a direction which each relay is horizontal, it is recommended that the product will be mounted so that the cable connector is positioned at the bottom. This position ensures the optimal vibration resistance of the relay.

Use optional end clamps (TS-XT) as needed to prevent the relays-and-terminal module from failing off and to ensure correct positioning of the relays.

● Installing and removing a relay

Installing a relay: While holding the relay perpendicular to the socket, insert the relay into the socket as shown below. Incorrect insertion may bend the relay terminals or damage the socket.

Removing a relay: Use the accessory remover to remove the relay from the socket.

● Component relay

This product uses the RB105 series of card relays as components. When replacing a relay, use a relay of the same type with the same voltage rating as that of the original.

● Make spaces between nearby devices

When mounting this product on a panel, be sure there is adequate space between the product and nearby devices and cable ducts, as shown in the figure at right.

This space enables operation of the connector-ejecting levers.

● Applicable cable connectors

Use Fuji Electric's connectors for cable connections (optional). Use of any other connector may damage the module connector or cause faulty connections.

Miniature control relays

■ Description

The HH52, 53 and 54 are a series of miniature general purpose relays specially designed for users demanding small size, sturdy construction and high electrical capacity. Mechanisms are furnished in polycarbonate dust-proof enclosures and are recommended for a multitude of electrical control applications for their reliability and compact size. Continuous duty coils, either AC or DC are available for voltages up to 240V AC or 120V DC. Contacts can be supplied in 2PDT, 3PDT, 4PDT arrangements. Continuous current ratings are 3, 5 and 7 Amps. Many terminal types are available for solder, plug-in or printed circuit board mounting.

■ Features

- 3, 5 and 7 Amp. contacts
- 2PDT, 3PDT and 4PDT
- Reliable operation, long service life
- High dielectric strength
- Solder, PC board, wire wrap and screw terminal socket
- AC or DC coils
- Barrired contacts for opposite polarity available
- Dust proof enclosures
- Approved by UL, CSA and TÜV
 UL recognized File No:
 E42419, E90265 (Socket)
 CSA: LR 20479
 TÜV:
 License No. R9251339 (HH52)
 R9251340 (HH53)
 R9251341 (HH54)
 T9251612 (TP58, 511, 514)
 T9251425 (RZ, FX)

■ General information

● Contacts

Miniature relays can be supplied with contacts that meet most electrical and mechanical contact requirements. The standard HH52, 53 and 54 series are of the single contact type as illustrated. The HH52W (2PDT) and HH54W (4PDT) relays are supplied with bifurcated contacts. These bifurcated contacts are with good conducting characteristics and are recommended where limited control power is available. The dielectric strength is 1000 volts rms 50/60Hz (between open contacts) which makes them more than adequate for power circuit use.

Contact arrangement are as follows:

Type	Contact arrangement	Rated thermal current
HH52U	2PDT	7 Amps
HH52, 52W	2PDT	5 Amps
HH53	3PDT	5 Amps
HH54U	4PDT	5 Amps
HH54, 54W	4PDT	3 Amps

Bifurcated contact

Single contact

● Coils

Coils are available with nominal voltages within the following ranges.

Coil voltage	Power consumption
6 to 120V DC	Approx. 0.9W
6 to 240V AC	Approx. 1.0VA
(50/60Hz)	(60Hz)

Special purpose relays can be supplied with diode for surge suppression, for operating display devices such as LED's, and magnetically held type.

● Enclosures

All miniature relays are enclosed in sturdy heat-resistant polycarbonate covers providing protection against dust and dirt.

Standard

Flange mounting

● Terminals

Plug-in type terminal

PC board type terminal

● Sockets

There is almost infinite choice of sockets. They can be adapted to all types of wiring including solder type, standard screw terminals, wire wrap and printed circuit. Sockets for rail mounting use are also available.

Industrial Control Relays

Miniature control relays

HH52, 53, 54

■ Versions

Operating status indicator

All relays can be supplied on request with a visual indicating signal—a light emitting diode (LED). LED's are fitted to relays with nominal operating voltages up to 240 volts. The LED emits highly visible red light for AC and green light for DC when power is applied to the relay coil, an extremely useful signal when trouble shooting either equipment or a system.

Surge suppression

We can also supply relays with a diode (or CR) for surge suppression. The highly efficient diode (or CR) is connected in parallel with the coil in order to suppress the surge generated within the coil. Consequently this coil can be used in electric circuits which include highly sensitive relays or transistors, etc. without interfering with their operation, so increasing the dependability of the equipment.

With operation indicator and surge suppression device

This type has a built-in operation indicator and surge suppressor.

With extra pick-up operating coil

This type is recommended for use in poor power supply environments.
Pick-up voltage: 65% of rated voltage (at 20°C)
Drop-out voltage: 10% of rated voltage (at 20°C)
Mechanical durability: 10 million operations
Other specifications are the same as those of the basic model.

High capacity type

This type is suitable for switching a load like solenoid. The current rating of the contacts is 7A for HH52PU and 5A for HH54PU. Other specifications are the same as those of the basic model.

With Au-plated Ag contact

Type HH □-J has gold-plated contacts. (Note: Models with bifurcated contacts and 4PDT high-capacity models are provided with gold-plated contacts as standard, even if their type number has no J.)

Dual coil magnetically held

One coil firmly holds the contacts in one position, the second coil releases them. This relay has a good memory stability because it will maintain the ON condition during loss of power. It operates on a momentary pulse to either coil. The relay saves space as well as power, since a single unit occupies half the space of a mechanically interlocking latching relay of the same rating. Voltages: 6V–110V AC, 6V–48V DC

Compact, lightweight, and economical power relay with a high contact rating HH62, 63, 64

■ **Features**

- High contact rating
Although compact and lightweight, this power relay has a contact rating of 10A. This relay is ideal for many kinds of electrical control equipment.
- High dielectric strength
Though very compact, this relay has a dielectric strength of 2,000V AC for 1 minute.
- Easy socket mounting
The input and output terminal arrangement makes the relay easy to mount on a control panel and easy to maintain and checks.
- Easy-to-identify coil voltages
Different coil voltages are shown by different insulating tape colors. The coil voltages can be seen at a glance.

Coil : 100, 200V AC

Coil: 100. 200V AC

General purpose relays HH22, 23, 24

■ Description

These high quality general purpose relays are suitable for multi-pole switching and, although economically priced, are dependable and sturdily constructed. They are available with coil voltages 24–130V DC and 24–240V AC with continuous current ratings of either 4 or 6 Amps. Standard contact buttons are silver. Contact arrangements are 2PDT, 3PDT and SPDT+2NO+1NC. Relays are enclosed in a polycarbonate dust cover with octal type 8 or 11 pin plugs.

■ Versions

Operating status indicator

These relays can be supplied with a visual operating indicator which greatly simplifies troubleshooting in all types of electrical control equipment.

Dual coil magnetically held

A momentary pulse to one of two coils results in the contacts being firmly held in one of two positions without further flow of current.

This gives this class of relays a good memory stability since it will retain a permanent latch position despite a loss of power.

Coil ratings are 24–220V AC and 24–110V DC.

Surge suppression

We can supply the relays with surge suppression device.

These relays can be applied for AC and DC operation.

Arc-barrier

The HH23PN-B is provided with arc-barriers which gives it protection from excessive loads. It can safely be used on polarized circuits and even small motor loads.

■ Type number nomenclature

Note: HH24PN type and relays with bifurcated contacts cannot be provided with arc barrier.

■ Ordering information

Specify the following:

1. Ordering code or type number

Notes: • Enter the coil voltage code in the ■ mark.
• Although the type in parenthesis denotes a relay having no arc barriers, it has good insulation performance equal to the relay with arc barriers, as it has enough insulation distance between contacts.

Annunciator Relay Units

RV and JH13PN

Plug-in type annunciator relay units RV and JH13PN

■ Description

RV series are plug-in octal base-type relays designed for modular use. They combine the necessary functions for annunciator systems and simplify the connection to bells, buzzers, alarm lights, flicker relays and lamp test pushbuttons, etc. in alarm systems. Alarm systems require many types of annunciators i.e. alarm lights which flash on and off, or which light in the case of trouble, and trouble pilot lamps with a MEMORY. Thus the relay unit varies according to its usage and the type of annunciator used. FUJI can supply a wide range of relay units to meet the needs of clients. A flicker relay JH13PN is now available. Schematic diagrams of alarm circuits can be supplied.

■ Features

- A relay unit is available to match your alarm system and to permit a simplified circuit.

● Flicker relay

Type (Ordering code)	JH13PN-□ (RF1-□)
Coil	Rated operating voltage
	100-110/200-220V AC, DC (selectable) 24, 48V AC/DC
	Operating voltage range
	85 to 120% of rated voltage
Output contact arrangement	SPDT
Flickering period	600msec.
Contact rated thermal current	6A
Insulation voltage	250V
Mechanical durability	10 million operations
Ambient temperature	-10°C to +40°C (no icing)
Insulation resistance	100MΩ at 500V DC megger
Dielectric strength	2000V AC rms 1 minute between control circuit and contact 1000V AC rms 1 minute between open contacts

Note: Enter the operating coil voltage code in the □ mark as follow:
24V AC/DC:CE, 48V AC/DC:CF, 100/110V AC/DC, 200/220V AC/DC:CH

- We can supply 10 different kinds of relay units which meet every situation.
- The compact design allows density mounting and so even if a number of units are installed together the space they occupy is small.
- Low power consumption
- The contact has a rated thermal current of 3 Amps.
- Highly dependable and trouble-free Relay units use the highly dependable FUJI miniature relay HH54B.
- Either lock or non-lock systems are available.
- Relay has a dielectric strength of 2000V AC for 1 minute.
- Alarm input contacts can be either normally open or normally closed.
- With surge suppression device Surges are suppressed by a surge suppressor. Therefore high sensitive relays or semiconductors can be connected to an annunciator circuit without malfunctions or damage.
- Available for uses input and output circuits in opposite polarity.

Time delay relays

FUJI time delay relays feature top performance and dependability. These compact industrial time delay relays are specifically designed for process control, machine tools, safety device control, and other applications in which space is at a premium and reliability essential. FUJI manufactures a wide variety of highly versatile time delay relays, which include Super Timers and digital timers that meet diverse needs in industry.

KKD05-126

■ Super Timers

● MS4S/Multimode and compact body

The MS4S is a timer with four operation modes. The on-delay, flicker, one-shot or signal off-delay operation modes can be selected.

See page 03/52 for further information.

KKD05-145

● ST7P/Miniature size

The ST7P is a highly efficient miniaturized on-delay timer.

The maximum timing interval is 12 hours.

See page 03/60 for further information.

Time Delay Relays
Super Timers
MS4S

Direct-reading time-scale and compact body
MS4S Super Timer
MS4S series Super Timers feature an easy setting and direct-reading system of four time-scale.

Features

- Time-scale indication window and time-scale selector
By turning a time-scale selector, the timing-scales appear in the indication windows one set a time.
Although this is a multimode timer, the optional times such as 56 or 27 minutes can be easily set with the direct-reading time-scale.
- Compact timer with instantaneous contact
On-delay timers with instantaneous contact, as well as multimode and on-delay timers, are compact.
The front to back length of the timers is only 66.5mm.
- Operation mode indication window and operation mode selector
Four operation modes are provided (MS4SM type only).
By turning the operation mode selector, the on-delay, flicker, one-shot, or signal off-delay operation mode can be selected. The present mode is shown in the operation mode indication window with the marks PO, FL, OS or SF.

- LED power ON and output indicator
The power-source lamp (Green) is lit when power is on and flickers during timer operation.
The output lamp (Red) is lit when the timed NO contact is on.
- Wide range of AC supply voltage
Supply voltages of 100 to 240V AC are commonly available (ordering code: AP type only).
- Instantaneous operation function with 0 indication
When the timer dial is set at 0, output is given instantaneously, allowing sequence checks to be performed easily.
- Time unit indication window and time unit selector
By turning the time selector, time units of 0.1 sec., sec., min, and hours. can be selected and made to appear in the indication window.
- Improvement of resistance to waveform distortion
The resistance to distortion of secondary voltage waveform of the power supply caused by inverters and uninterruptible power supplies (UPS) is improved.

- UL, CE and TÜV approved

Timing range/16 ranges

Table with 5 columns: Time-scale, Time unit indication window (0.1s, sec, min, hrs), and corresponding timing ranges.

R50006667 (MS4SA, MS4SC)

Time Delay Relays
Super Timers
MS4S

■ Timing and wiring diagrams

MS4SM

1. On-delay PO

- Turn the mode selector until **PO** is displayed.
- When power is on, applying the start signal turns the timed NO (Normally open) contact on after the set time has elapsed.
- For the power-on start, the start signal pins (2 and 6) must be connected in advance.

2. Flicker FL

- Turn the mode selector until **FL** is displayed.
- When power is on, applying the start signal turns the timed contact on and off repeatedly at the set time intervals.

3. One-shot OS

- Turn the mode selector until **OS** is displayed.
- When power is on, applying the start signal instantly turns the timed NO contact on and turns it off after the set time has elapsed.

4. Signal off-delay SF

- Turn the mode selector until **SF** is displayed.
- When power is on, applying the start signal instantly turns the timed NO contact on. Removing the start signal turns the contact off after the set time has elapsed.

MS4SA

● On-delay

- When power is applied, the timed NO contacts make after the set time has elapsed.
- When power is removed, the contacts reset.

MS4SC

● On-delay

- Timed contact
When power is applied, the NO contact makes after the set time has elapsed. When power is removed, the contacts reset.
- Instantaneous contact
When power is applied, the NO contact makes instantly. When power is removed, the contacts reset.

Notes: • T=Set time. T-a=Time period within the set time
• The gate signal is used to interrupt the elapsing of timing operation.

■ Timing and wiring diagrams

● MS4SF type off-delay timer

MS4SF-R type off-delay timer

MS4SY type star-delta timer

Note: Do not use terminal ③ of the MS4SF-R as a relay terminal because it is connected to terminals ① and ② in the timer.

● MS4SF type

Operation	Operation pattern	Remarks
Off-delay (Timed 2PDT contacts)		• When power is on, timed NO contact on. • When power is off, timed NO contact off after the set time has elapsed.

● MS4SF-R type

Operation	Operation pattern	Remarks
Off-delay (Timed SPDT contact)		• When power is on, timed NO contact on. • When power is off, timed NO contact off after the set time has elapsed. • When the instantaneous reset signal is on, timed NO contact immediately off.

Notes: • T-a indicates some time within a set time.
• Each signal can be input by shorting the terminals.
• For the MS4SF-R, apply the instantaneous reset signal for 100 ms or longer.

● MS4SY type

Operation	Operation pattern	Remarks
Λ-Δ (with instantaneous contact 1NO)		• Timed contact Timed contact Λ on when the power is on, and off after a set time. Timed contact Δ on after a changeover time has elapsed and opens when the power turns off. • Instantaneous contact When the power is turned on, instantaneous NO contact on. It opens when the power turns off.

Time Delay Relays

Super Timers

ST7P, 7B

Miniature size Super Timer

ST7P series

The ST7P and ST7B series are compact and highly accurate Super Timers.

The ST7P and ST7B are on-delay operation types.

■ Features

- These Super Timers are highly accurate. Their repeat accuracy is less than ±1% at maximum setting time.

- Timing range
ST7P and ST7B are the single timing range types; 0.06 sec. to 24 hours.
- The large setting dial makes time setting easy.
- The LED indicators make it easy to check timer operation.
- The ST7P has been approved by the UL, us and TÜV.

■ Standards

UL file No. Body: E44592

■ Ordering information

Specify the following:

- Ordering code or type number of body (add a suffix of the timing range) and socket. (Socket is sold separately.)

Catalog Disclaimer

The information contained in this catalog does not constitute an express or implied warranty of quality, any warranty of merchantability or fitness for a particular purpose is hereby disclaimed.

Since the user's product information, specific use application, and conditions of use are all outside of Fuji Electric FA Components & Systems' control, **it shall be the responsibility of the user to determine the suitability of any of the products mentioned for the user's application.**

One Year Limited Warranty

The products identified in this catalog shall be sold pursuant to the terms and conditions identified in the "Conditions of Sale" issued by Fuji Electric FA with each order confirmation.

Except to the extent otherwise provided for in the Conditions of Sale issued by Fuji Electric FA, Fuji Electric FA warrants that the Fuji Electric FA products identified in this catalog shall be free from significant defects in materials and workmanship provided the product has not been: 1) repaired or altered by others than Fuji Electric FA; 2) subjected to negligence, accident, misuse, or damage by circumstances beyond Fuji Electric FA's control; 3) improperly operated, maintained or stored; or 4) used in other than normal use or service. This warranty shall apply only to defects appearing within one (1) year from the date of shipment by Fuji Electric FA, and in such case, only if such defects are reported to Fuji Electric FA within thirty (30) days of discovery by purchaser. Such notice should be submitted in writing to Fuji Electric FA at 5-7, Nihonbashi Odemma-cho, Chuo-ku, Tokyo, Japan. The sole and exclusive remedy with respect to the above warranty whether such claim is based on warranty, contract, negligence, strict liability or any other theory, is limited to the repair or replacement of such product or, at Fuji Electric FA's option reimbursement by Fuji Electric FA of the purchase price paid to Fuji Electric FA for the particular product. **Fuji Electric FA does not make any other representations or warranties, whether oral or in writing, expressed or implied, including but not limited to any warranty regarding merchantability or fitness for a particular purpose.** Except as provided in the Conditions of Sale, no agent or representative of Fuji Electric FA is authorized to modify the terms of this warranty in writing or orally.

In no event shall Fuji Electric FA be liable for special, indirect or consequential damages, including but not limited to, loss of use of the product, other equipment, plant and power system which is installed with the product, loss of profits or revenues, cost of capital, or claims against the purchaser or user of the product by its customers resulting from the use of information, recommendations and descriptions contained herein. The purchaser agrees to pass on to its customers and users, in writing at the time inquiries and orders are received by buyer, Fuji Electric FA's warranty as set forth above.

Caution "Safety precautions"

- Operate (keep) in the environment specified in the operating instructions and manual. High temperature, high humidity, condensation, dust, corrosive gases, oil, organic solvents, excessive vibration or shock might cause electric shock, fire, erratic operation or failure.
- Follow the regulations of industrial wastes when the product is to be discarded.
- The products covered in this catalog have not been designed or manufactured for use in equipment or systems which, in the event of failure, can lead to loss of human life.
- If you intend to use the products covered in this catalog for special applications, such as for nuclear energy control, aerospace, medical, or transportation, please consult your Fuji Electric FA agent.
- Be sure to provide protective measures when using the product covered in these catalogs in equipment which, in the event of failure, may lead to loss of human life or other grave results.
- Follow the directions of the operating instructions when mounting the product.
