

SINGLE-SUPPLY QUAD COMPARATOR

■ GENERAL DESCRIPTION

The NJM2901C / NJM2901CA consist of four independent voltage comparators that are designed specifically to operate from a single power supply over a wide range of voltages. Operation from split power supplies is also possible and the low power supply current drain is independent of the magnitude of the power supply voltage. The NJM2901C / NJM2901CA has a unique characteristic: the input common-mode voltage range includes ground, even though operated from a single power supply voltage. Application areas include limit comparators, simple analog-to-digital converters; pulse, square-wave and time delay generators; wide range V_{CO} ; MOS clock timers; multi-vibrators and high voltage digital logic gates. The NJM2901C / NJM2901CA were designed to directly interface with TTL and MOS. When operated from both plus and minus power supplies, the NJM2901C will directly interface with MOS logic where their low power drain is a distinct advantage over standard comparators.

(SOP14)

NJM2901CV
NJM2901CAV
(SSOP14)

■ FEATURES

- Operating Voltage +2V to +36V
- Single Supply Operation
- Open Collector Output
- Package Outline SOP14, SSOP14
- Bipolar Technology
- Internal ESD protection
 - Human body model (HBM) $\pm 2000V$ typ.
- Wide temperature range $-40^{\circ}C$ to $+125^{\circ}C$
- Input Offset Voltage Grade

NJM2901C(Normal-Grade)	NJM2901CA(A-Grade)
5mV max.	2.5mV max.
