

Shaft Spacer - 1"

☺ ROB-12193

DESCRIPTION

FEATURES

These plastic shaft spacers have an inner diameter of 1" and a thickness of 1/16". These spacers are ideal for spacing out an area between a bearing and a shaft collar to reduce metal to metal contact.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
