

Surface Mount Quad PNP Transistor

2N6987U (TX, TXV)

Features:

- Ceramic 20 pin surface mount package
- Small package to minimize circuit board area
- Electrical performance similar to a 2N2907
- Hermetically sealed
- Processed per MIL-PRF-19500/558

Description:

The 2N6987U (TX, TXV) is a hermetically sealed, ceramic surface-mount device, consisting of 4 silicon PNP transistors. The 20 pin ceramic package is ideal for designs where board space and device weight are important design considerations.

Typical screening and lot acceptance test are per MIL-PRF-19500/558. The burn-in condition is $V_{CB} = 30\text{ V}$, $P_D = 250\text{ mW}$ each transistor, $T_A = 25^\circ\text{ C}$. Refer to MIL-PRF-19500/558 for complete requirements.

When ordering parts without processing, do not use the TX or TXV suffix.

Applications:

- General switching
- Amplification
- Signal processing
- Radio transmission
- Logic gates
