

SX-SDMAN2

802.11a/b/g/n Plus Bluetooth SDIO Module

Next Generation SDIO Wireless LAN Module for Mobile Devices

The Silex SX-SDMAN2 is a dual-band 802.11a/b/g/n plus Bluetooth SDIO module that is based on the SX-SDPAN2 (Qualcomm Atheros QCA6234). It supports both 1x1 and 2x2 antenna configurations. The SX-SDMAN2 in 2x2 MIMO mode offers improved WLAN throughput, range and robustness to portable devices including patient monitors, printers, handheld terminals and more.

The SX-SDMAN2 is pre-tuned for the most optimized dual-band WLAN performance. The radio module design approach also saves cost as the SX-SDMAN2 provides FCC/IC/ETSI/TELEC modular certification.

The SX-SDMAN2 provides superior product quality. Silex has validated that our design meets IEEE standards and each module is individually tested during the production process. This ensures that each of our products will perform to our published specification.

In order to expedite your product development process, Silex can provide both hardware and software engineering services including custom driver development, as well as turnkey product design and manufacturing.
