product catalogue 2016

FOLLOW THESE STEPS TO FIND YOUR LIBELIUM SOLUTION

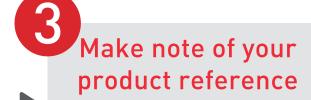

What are you looking for?

You can select from three different options depending on your needs.

Configure your selection

Select the components step by step from the top menu.

Complete the form with the chosen references to place your order.

1° Customize your device Sensors + Connectivity + Power Options

2° Decide the way to access the data

Extracting the Data

3° Choose Support & Training options
Support Section

Make note **Product reference**

Complete the Order Form

Send to your Sales Agent

WHAT ARE YOU LOOKING FOR?

Testing IoT Market!

- Decide quickly the components to test.
- Use your time to check if technology meets your requirements, not programming.
- · Maximize your budget: test the market with the minimum risk.

Out-of-the-Box IoT Vertical Kits

- · Out-of-the-Box working demos.
- · Data visualization tool.
- Includes online consultancy bonus.

Looking for a ready to install solution

- · Reduce your time to market.
- Save in development costs.
- · Focus on the solution.

Waspmote Plug & Sense!

- · Encapsulated and robust solution ready to install outdoors.
- Factory programmed and configured devices.
- · Customized online support.

Doing research and development

- · Get the maximum flexibility in programming.
- Use your extra time to save on support options.

Waspmote OEM

- Select the components one by one to test at the laboratory.
- Free support through our forums and documentation.
- · Join our Free Overview Webinars to get guick insights about our technology.

Technology to get new customers

If you are exploring IoT possibilities with a pilot project, setting up a demo to engage with potential customers or just comparing technology options, time is the most important factor.

We have created five different IoT Vertical Kits addressing the most dynamic IoT verticals and one evaluator kit to ensure you get started in as fast as possible. The vertical kits are factory programmed with basic codes, include a visualization plugin in Meshlium¹ and 5 hours of technical consultancy so that you can have a working demo just by powering on the devices.

1.- Visualization plugin only available in IoT Vertical Kits.

We provide prices in USD to US customers. Please submit your RFQ, and we will provide you with the USD prices.

Smart Cities IoT Vertical Kit

Application examples:

Application	Description	Sensors
Noise Urban Maps	Sound monitoring in bar areas and centric zones in real time.	Microphone (dBA).
Smart Lighting	Intelligent and weather adaptive lighting in street lights.	Luminosity (luxes accuracy).
Waste Management	Detection of rubbish levels in containers to optimize the trash collection routes.	Ultrasound.
Air Quality	Control of the pollution levels.	CO ₂ , NO ₂ , CO, O ₃
Weather Control	Monitor atmospheric conditions.	Humidity, Luminosity (LDR), Temperature.

Smart Agriculture IoT Vertical Kit

Application examples:

Application	Description	Sensors
Wine Quality Enhancing	Monitoring soil moisture in vineyards to control the amount of sugar in grapes and grapevine health.	Soil moisture, soil temperature, humidity, leaf wetness, atmospheric pressure.
Green Houses	Control micro-climate conditions to maximize the production of fruits and vegetables.	Soil moisture, soil temperature, humidity, leaf wetness, atmospheric pressure.
Golf Courses Irrigation	Selective irrigation in dry zones to reduce the water resources required in the green.	Soil moisture (3 levels of depth).
Compost	Control of humidity and temperature levels in alfalfa, hay, straw, etc. to prevent fungus and other microbial contaminants.	Humidity, soil moisture, soil temperature.

Smart Water IoT Vertical Kit

Application examples:

Application	Description	Sensors
Potable water monitoring	Monitor the quality of tap water in cities.	pH, ORP, Dissolved Oxygen (DO).
Chemical leakages	Detect leakages and wastes of factories in rivers.	Extreme pH values signal chemical spills, Dissolved Oxygen (DO).
Swimming pool remote measurement	Control remotely the swimming pool conditions.	pH, Oxidation Reduction Potential (ORP).
Pollution levels in the sea	Control real-time leakages and wastes in the sea.	Conductivity (Salinity), pH, Dissolved Oxygen (DO).

Evaluator Kit

This kit is designed to compare different radio technologies or create customized demos. It contains the most demanded products in our catalogue, so that you do not need to spend lots of time configuring your order.

To ensure you start testing the products as soon as possible, we include 1 attendee place at Libelium training course where you will learn from installing the IDE to program Waspmote (more info about training courses on section <u>Support</u>).

Finally, we also include a 3-hour package of online technical consultancy, to solve quickly any doubt you may have when getting your hands on Waspmote. Both training courses and consultancy hours are given with Libelium R&D engineers.

Waspmote Plug & Sense!: technology ready to install

Waspmote Plug & Sense! is the the best option to use in commercial deployments. It has been designed with a robust waterproof enclosure that simplifies installation and maintenance process. Moreover, you can order them factory-programmed saving you development costs and time. The result is a ready to install and easy to deploy sensor device that reduces time to market in any application. You can focus on your customer and forget about the sensing part.

Any scenario	 80+ sensors available, up to 6 sensors per sensor device Communication: 802.15.4, 868/900MHz, LoRaWAN, LoRa, Sigfox, ZigBee, WiFi, 3G/GPRS and Bluetooth Low Energy
For real projects	 Robust waterproof IP65 enclosure Solar powered with internal and external panel options
Fast installation	 Factory-programmed and configured Special holders and brackets to install in street lights and building fronts ON / OFF external button External socket for SIM card
Easy maintenance	 Remote firmware upgrades of multiple nodes at once (OTAP) Replace or add a sensor probe in seconds External, contactless device-reset with magnet

Configuring your Plug & Sense! device

You can customize any Waspmote Plug & Sense! model by choosing the radio, power option, sensors and optional accessories.

Since each sensor has different power requirements and dedicated circuitry, sensor probes can be attached only to certain sockets (named A - F in the figure). There is a sensors table in all the models explaining all the possible connections between sensor probes and sockets.

Each socket supports one sensor at the same time

In this example the CO Sensor can be connected to the socket A or F indistinctly

Smart Water

The Smart Water model has been conceived to facilitate the remote monitoring of the most relevant parameters related to water quality. With this platform you can measure more than 6 parameters, including the most relevant for water control such as dissolved oxygen, oxidation-reduction potential, pH, conductivity and temperature. An extremely accurate turbidity sensor has been integrated as well.

Smart Water Ions

The Smart Water lons models specialize in the measurement of ions concentration for drinking water quality control, agriculture water monitoring, swimming pools or waste water treatment. Due to the existance of 3 types for the reference probe and 2 types of sensor probes ("normal" and PRO), there are 3 variants: Smart Water lons Single, Smart Water lons Double and Smart Water lons PRO. See below the suitable version depending on the sensors needed.

Smart Parking

This model allows to detect free parking spots. It is designed to be screwed on the surface of parking slots and to detect the arrival and departure of vehicles with an electromagnetic field sensor. It includes a robust polyamide enclosure for a fast and easy surface installation.

This node comes with 2 radios, Sigfox and LoRaWAN, which benefit from all the LPWAN characteristics. The device is easily configured from a PC and can even be reconfigured with the Remote Manager, from the cloud.

This model comes with a non-rechargeable battery of 10.4 Ah.

Smartphone Detection for Traffic Congestion and pedestrian counting

This application is performed with Meshlium and it is the only one that does not allow to attach any sensor. Meshlium can detect any Smartphone in the area by measuring WiFi and Bluetooth activity. This way, pedestrian and traffic congestion can be determined in real time. Meshlium is also the Internet Gateway for Waspmote Plug & Sense! It is possible to combine these two features (scanning and internet gateway) within the same machine. For more information about Meshlium models and prices see Meshlium section.

Accessories

The following items are optional. Feel free to choose!

Accessories	Ambient Control	Smart Cities	Smart Parking	Smart Environment	Smart Environment PRO	Smart Agriculture	Smart Security	Smart Water	Smart Water Ions	Radiation Control	Ref.	Price
Extension cord 1.5 m ⁽¹⁾	\checkmark	\checkmark	X	✓	X	✓	✓	√ (2)	√ (2)	X	10250	8€
Extension cord 3 m ⁽¹⁾	✓	✓	X	✓	X	✓	✓	√ (2)	√ (2)	X	10251	10€
Magnet for contactless reset (3)	\checkmark	\checkmark	√ (4)	\checkmark	\checkmark	\checkmark	\checkmark	\checkmark	\checkmark	\checkmark	10342	25€

- 1.-Extension cords are compliant with most sensor probes. One extension cord per sensor required.
- 2.- In Smart Water or Smart Water lons, extension cords are only compliant with the Soil/Water temperature probe.
- 3.- A single magnet can be used for many motes. It is highly recommended.
- 4.- The magnet is EXTREMELY recommended for Smart Parking.

Now that you have configured your hardware, go to Data section to decide how to connect to the Cloud.

We provide prices in USD to US customers. Please submit your RFQ, and we will provide you with the USD prices.

Waspmote OEM: technology for developers

Waspmote OEM is the best option to research and develop. With a good C++ programming level, you can explore multiple possibilities with its Open Source API, 400+ online code examples and documentation.

Since it has no enclosure, you can try all kind of different hardware combinations, it is more handy to work with it at your lab table and you can use that extra money in getting more sensors and communication modules.

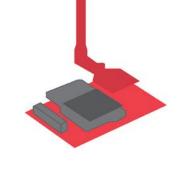

For configuring your hardware you will have to choose:

Industrial Protocols

Waspmote can integrate communication modules for the most common wired communication protocols: RS-485, RS-232, CAN Bus and Modbus. These are widely used standards in the industrial and automation market for connecting devices and sensors, not in a wireless way but with cables. The user can interface Waspmote ecosystem with these protocols.

Waspmote allows to perform three main applications:

- 1. Connect any sensor to an existing industrial bus.
- 2. Add wireless connectivity to wired buses.
- 3. Connect to the Cloud industrial devices.

Waspmote price chart depending on model:								
Model	Ref.	Price	Price > 5 units					
Waspmote RS-232 Serial / Modbus + DB9 cable	WA-232	142€	134€					
Waspmote RS-485 / Modbus + DB9 cable	WA-485	162€	152€					
Waspmote CAN Bus + DB9 cable	WA-CAN	160€	150 €

Expansion Radio Board

The Expansion Board allows to connect two radios at the same time. This means a lot of different combinations are possible using any of the radios available for Waspmote: 802.15.4, Digimesh, ZigBee, Bluetooth, Bluetooth Low Energy, RFID/NFC, WiFi, GSM/GPRS, GPRS+GPS, 3G/GPRS, 868 MHz, 900 MHz, LoRaWAN, LoRa and Sigfox. Besides, the Expansion Radio Board can be utilized to connect the Industrial Protocols modules.

Applications:

- Multifrequency Sensor Networks: (2.4GHz 868/900MHz, LoRa)
- Sigfox ZigBee hybrid networks
- NFC (RFID) applications with GPRS
- LoRaWAN WiFi hybrid networks
- Industrial Protocols wireless hybrid networks

Extracting the data

The last point for configuring a sensor network is to decide the way to access the data. There are 3 alternatives:

Meshlium

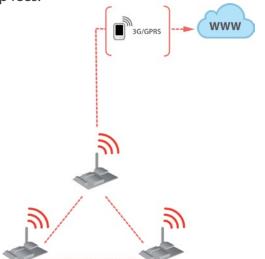

This is the most recommended option for outdoor networks since it is encased in a rugged, waterproof enclosure which protects it from the harshest conditions. It can receive, parse and store frames via ZigBee, 3G/ GPRS or WiFi in its local database. Meshlium can also forward sensor data directly to the Internet via Ethernet, Wi-Fi or 3G/GPRS protocols, depending on the connectivity options available in the area.

Waspmote GPRS / 3G / LoRaWAN / Sigfox

GPRS or 3G can be used in networks placed in difficult access locations, when using a single point of data collection alone or in combination with the other two options, using the cellular radio only to send SMS alert messages.

Sigfox and LoRaWAN are a special cases of cellular communications: LPWAN (Low Power, Wide Area Network). They are indicated for many applications (Smart Cities, Smart Parking, security, etc). Nodes send data directly to the back-end with low power consumption and cheap fees.

Waspmote Gateway

Connected by USB to a computer. This is recommended for applications of few nodes that are indoors or for testing while configuring the network. The Waspmote Gateway is also used to send commands to the sensor network, thus at least one unit should be purchased with the first kit of Waspmotes.

Meshlium

Meshlium Xtreme is the best Internet Gateway for Waspmote. It is a Linux based mesh router, totally modular and specially designed for harsh conditions without compromising flexibility in the installation. Meshlium can directly send sensor data from Waspmote to many 3rd party Cloud platforms. When ordering your Waspmotes factory-programmed, you can indicate the Cloud platform you want to work with and we will ship your devices ready to install and work, reducing your deployment costs.

Any scenario	 Communication Waspmote → Meshlium: 802.15.4, ZigBee, Digimesh, 868/900 MHz Meshlium → Internet: WiFi, Ethernet and 3G/GPRS WiFi and Bluetooth interface detection to detect smartphones (traffic congestion applications) Solar or battery powered
Fast configuration	 GUI to configure in a visual and easy way (includes factory presets to make installation even faster) Integrated with 3rd party Cloud platforms, required agents installed by default in all Meshliums
Easy installation	 Special holders and brackets to install in street lights and building fronts Elbow connectors included in all models to place antennas horizontally External socket for SIM card
Easy maintenance	 Get the latest software version with just one click Robust waterproof IP65 enclosure Notifications buzzer
