Description

The Supermicro PWS-741P-1R is an 80 Plus Platinum level redundant power supply capable of supplying   output power at 94% efficiency. Enjoy the simplicity of active power factor correction (PFC) an   oma   correct AC input for a full range of voltages. Features a card edge connector for connection with the backp

of compatible Supermicro 1U systems. This power supply is designed to not only provide you reliable power to your Supermicro server but also protects it from over voltage, over current and short circuiting via protective circuitry embedded into the unit. Rest easy knowing your hardware will be up and running with a mean-time between failure (MTBF) of greater than 200,000 hours and an LED indicator to keep you informed on normal/abnormal conditions for your PSU. This power supply is redundant to safe-guard your system from power failure and allows for hot-swap replacement to eliminate system downtime. All materials contained comply with RoHS requirements and is certified by Supermicro.
