# High-Side and Low-Side Gate Driver

# **FAN7382**

The FAN7382, a monolithic high and low side gate-drive IC, can drive MOSFETs and IGBTs that operate up to +600 V. **onsemi**'s high-voltage process and commonmode noise canceling technique provides stable operation of the high-side driver under high-dv/dt noise circumstances. An advanced level-shift circuit allows high-side gate driver operation up to  $V_S = -9.8$  V (typical) for  $V_{BS} = 15$  V. The input logic level is compatible with standard TTL-series logic gates. UVLO circuits for both channels prevent malfunction when  $V_{CC}$  or  $V_{BS}$  is lower than the specified threshold voltage. Output drivers typically source/sink 350 mA/650 mA, respectively, which is suitable for fluorescent lamp ballasts, PDP scan drivers, motor controls, etc.

#### Features

- Floating Channels Designed for Bootstrap Operation to +600 V
- Typically 350 mA/650 mA Sourcing/Sinking Current Driving Capability for Both Channels
- Common-Mode dv/dt Noise Canceling Circuit
- Extended Allowable Negative V<sub>S</sub> Swing to -9.8 V for Signal Propagation at V<sub>CC</sub> = V<sub>BS</sub> = 15 V
- $V_{CC}$  &  $V_{BS}$  Supply Range from 10 V to 20 V
- UVLO Functions for Both Channels
- TTL Compatible Input Logic Threshold Levels
- Matched Propagation Delay Below 50 ns
- Output In–phase with Input Signal
- These are Pb-Free Devices

See detailed ordering and shipping information on page 12 of this data sheet.

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected. 1. Mounted on  $76.2 \times 114.3 \times 1.6$  mm PCB (FR-4 glass epoxy material). 2. Refer to the following standards:

JESD51-2: Integral circuits thermal test method environmental conditions - natural convection

JESD51-3: Low effective thermal conductivity test board for leaded surface mount packages

3. Do not exceed P<sub>D</sub> under any circumstances.
