

TDGL024 - Digilent Analog Discovery BNC Adapter Board ★

Mature Product

Part Number: TDGL024

Share

The Discovery BNC adapter board is for use with the Analog Discovery™ tool. It enables the use of standard BNC-terminated test leads and probes providing BNC terminations to each of the two oscilloscope channels on the Analog Discovery.

Features

Each channel of the oscilloscope can be selected as AC- or DC-coupled by adjusting the jumper that is located behind that channels BNC input connector. Also, the two AWG channels are equipped with BNC terminations, and each channel can have either the 50-ohm or the 0-ohm termination selected.
