★★★★★ **Best in the price range**

about 3 years ago by CSDexter ✔ verified purchaser

I have two sets of these, one for myself and a second one to use in a local maker's class. Both groups of users are very happy with the quality, both of the wires and the connectors.

The only way this could be better (for some) is if the wires would be of the hi-flex silicone type, but I for one prefer them stiffer as they are now.

★★★★★ **Just what I needed and a good price**

about 3 years ago by WA0TTN ✔ verified purchaser

What more can I say, these were just what I needed for my project and the price was right.

★★★★★ **GOOD and useful jumpers.**

about 2 years ago by Member #541774 ✔ verified purchaser

They are jumpers...what more can I say.!!! ok, lovely colors, all the same length, excellent plugability..

★★★★☆ **Very good**

about 2 years ago by Member #822637 ✔ verified purchaser

These were exactly what I needed for a hardware project for class. They worked exactly as expected. The different colors reduced errors to nil.

El producto como tal no lo puedo calificar, ya que soy la persona encargada de todas las compras de nuestra institución, pero lo que si califico es la agilidad y velocidad en la entrega de los productos adquiridos. Vale la pena aclarar que, he solicitado información al usuario de sus productos y los ha calificado muy bien

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
