Use according to UL:

RAFIX control devices are defined at RAFI as modular elements, consisting of an actuating element, if necessary a coupling and an individual contact or lighting unit.

Actuating elements (such as pushbuttons, emergency stop actuators, etc.) have the intended tactility, reset and function only when assembled with the appropriate switching elements.

System drawing

Technical drawing showing a 2x2 grid of circular features. The horizontal distance between the centers of the top two circles is labeled "min 30". The vertical distance between the centers of the right two circles is labeled "min 30". Each circle has a small rectangular protrusion at the top center. The drawing uses center lines (dashed lines) to indicate the center of each circle.
